INDEX

ABBE (PROF. CLEVELAND): Meteoritic Theory, 53; the Red Sunsets of 1884–85, 189; Observations of Twilight and Zodiacal Light during the Total Eclipse of the Sun, December 21, 1889, 519; on the Determination of the Amount of Rainfall, 585

Abbo (Dr.), Colour of Eyes and Hair in Norway, 285

Abercromby (Hon. Ralph): Rain Clouds on Lake Titicaca, 12; Upper Wind Currents over the Equator in the Atlantic Ocean, 101; Nitrate of Soda and the Nitrate Country, 186, 308; Sun Water-Distilling Apparatus on Atacama Desert, 211; the Circulation of the Atmosphere over the Equator, 297

Abney (Captain W. de W., C.B., F.R.S.): Opening Address in Section A (Mathematics and Physics) at the British Association, 469; on the Quantity of Deposit of Silver produced by the Development on a Photographic Plate in Terms of the Intensity of Light acting, 584

Abnormality in Tropæolum, Prof. Alfred Denny, 125

Abrus precatorius, Toxic Action of Albumose from Seeds of, Dr. Sidney Martin, 117

Accent, French, Researches with Phonautograph on, Dr. Pringsheim, 168

Accra, Earthquake at, 61

Acoustics: Dr. Rudolph Kœnig on an Important Discovery in the Theory of Music, 479; Mechanical Illustration of Propagation of Sound-Wave, F. J. Smith, 620

Acquired Characters, on the supposed Transmission of, E. B. Poulton, F.R.S., 610

Actiniæ, British, Revision of the, Prof. A. C. Haddon, 390

Actinometer: devised by Prof. Balfour Stewart, F.R.S., 556; a New Self-registering, Dr. Richardson, 587

Adams (Prof. W. Grylls, F.R.S.), Fifth Report to the British Association on the Best Means of Comparing and Reducing Magnetic Observations, 554

Adelsberg Stalactite Grotto, the New, 577

Affinity, Chemical, M. M. Pattison Muir, 273

Afghan Delimitation Commission, the Zoology of the, E. T. Aitchison, 413

Afghanistan, Northern, Major C. E. Yate, 31

Africa: Penetration of Kong Country by Captain Binger, 17; the Soil and Climate of German East Africa, Dr. K. W. Schmidt, 46; H. M. Stanley's Movements, 181, 539; African River Life, J. R. Werner, 241; Mites in Entomological Collections from South Africa, 283; African Farm Pests, Eleanor A. Ormerod, 385; Concession to British East Africa Company of Lamu and Ben-Adir Coast, 449; Narrative of an Explorer in Tropical South Africa, Francis Galton, F.R.S., 570; the Gold Deposits of the Gold Coast, Sir Brandford Griffith, 627

Agassiz (Alexander), the Three Cruises of the *Blake*, Dr. John Murray, 361

Agram, Earthquake at, 45

Agriculture: Ravages of Cockchafer and its Larva, J. Reiset, 23; Loss and Gain of Nitrogen in Soils, P. P. Dehérain, 48; a Record of Progress in Agricultural Canada, W. Fream, 52; a Treatise on Manures, by Dr. A. B. Griffiths, 99; School of Practical Agriculture at Fabriano, 164; Proposed Chair of Agriculture at North Wales University College, 207; International Congress on, in Paris, 252; the Industrial Agricultural Educational Bill, 254; the Cost of Various Remedies against Vine-pests, 374; Agricultural Society of the Gironde, 374; Agriculture in Colombia, 423, 596; an Italian's View of English Agricultural Education, Prof. John Wrightson, 428; Agricultural Experimental Stations in the United States, 455; Agricultural Laboratories in Belgium, 481; Prof. Wallace's Farm Live Stock of Great Britain, 619

Ainos, Colour of Eyes and Hair of, Lefèvre on, 68

Air in the Soil, Th. Schlœsing, *fils*, 626

Aitchison (E. J.), the Zoology of the Afghan Delimitation Commission, 413

Aitken (John), the Dust-particles in Atmosphere at Ben Nevis Observatory, 356

Albatross: Sailing Flight of the, A. C. Baines, 9; Lord Rayleigh, F.R.S., 34; R. E. Froude, 102; the Wandering Albatross, A. Reischek, 306

Albert Nyanza, Lake, Sir S. Baker and H. M. Stanley on, 65

Aldehydes, M. Grimaux, 369

Aldis (Prof. W. Steadman), Spherical Eggs, 417

Alembert's (D') Principle, Centrifugal Force and, Prof. F. Guthrie, 319

Alexander (S.), Moral Order and Progress, an Analysis of Ethical Conceptions, 169

Algebra: Key to Higher, H. S. Hall and S. R. Knight, 460

Algebra, Solutions of the Examples in a Treatise on, Charles Smith, 31

Algebra, a Treatise on Elementary, and Algebraical Artifices, Saradaranjan Ray, 9

Algeria, the Dangers of Viticulture in, Consul-General Playfair, 423

Algiers Observatory, 539

Allen (Alfred H.), Commercial Organic Analysis, Dr. C. R. Alder Wright, F.R.S., 289

Allman (Prof. Geo., F.R.S.), Greek Geometry from Thales to Euclid, 172; the Theorem of the Bride, 299

Alloys of Nickel and Steel, James Riley, 58

Alloys, Raoult's Method applied to, C. T. Heycock and F. H. Neville on, 587, 628

Alloys, Strength of, at Different Temperatures, W. C. Unwin, F.R.S., 631

Allport (S.), Contact Metamorphism in Silurian Rocks near New Galloway, 190

Aluminium: Sir Henry Roscoe, M.P., F.R.S., 182; Dr. Nello's Process for the Manufacture of, from Cryolite, Prof. Bedson, 587

Aluminium Chloride, the Vapour-density of, Profs. Nilson and Pettersson, 596

Amagat (E. H.), the Elasticity of Solids, 192

Amateurs, Cactus Culture for, W. Watson, 123

America: American Journal of Science, 21, 67, 189, 310, 404, 562; American National Academy of Science, 44; American Meteorological Society, 117; Palæolithic Man in America, W. J. McGee, 163; Remains of Lake-dwellings in North America, 180; American Meteorological Journal, 189, 262, 311, 383, 445, 611; Long-time Weather Predictions in America, 208; American Association for Advancement of Science, 228, 556; American Journal of Mathematics, 334; Two American Institutions, J. Taylor Kay, 346; Count Loubat's

Prize for Encouragement of North American Studies, 372; the Fruit Pest, *Curculio*, in America, Riley and Howard, 373; Colonel Labre's Explorations of Regions between Beni and Madre de Dios and Purus Rivers, 353; the American Association, 372; American Philosophical Society, 373; American Antiquities, W. H Holmes, 437; Decay of the Reading Habit in America, W. C. Wilkinson, 548; Centenary of the American Philosophical Society at Philadelphia, 576; the Sparrow in America, 627
Ames (Joseph S.), Dr. Grünwald's Mathematical Spectrum Analysis, 19
Amia, Lateral Line System in, Minot and Allis on, 419
Amine, a New, Drs. Skraup and Wiesmann, 14
Ammon (O.), Results of Observations of Skulls of 5000 Baden Soldiers, 653
Ammonia, the Nitrification of, Th. Schlœsing, 539
Amsterdam Royal Academy of Sciences, 120, 216, 312
Amylo-dextrin, Brown and Morris on, 214
Analysis, Commercial Organic, Alfred H. Allen, Dr. C. R. Alder Wright, F.R.S., 289
Anapophyses, Dr. St. George Mivart, F.R.S., 394
Anatomy, Comparative, the Large Bones of the Anthropoid Apes, Etienne Rollet, 287
Anatomy, Comparative, Lehrbuch der Vergleichenden Anatomie zum Gebrauche bei vergleichend anatomischen und zoologischen Vorlesungen, Dr. Arnold Lang, 124
Anatomy of the Humpback Whale (*Megaptera longimana*), John Struthers, 592
Ancient Art of the Province of Chiriqui, W. H. Holmes, 436
Ancient Civilization, the History of, Rev. J. Verschoyle, 7
Anderson (J. W.), the Prospector's Hand-book, 293
Anderson (Prof. R. J.), Apparatus to illustrate Crystal Forms, 71
Anderson (William), Opening Address in Section G (Mechanical Science) at the British Association, 509
Andersonian Naturalists' Society of Glasgow, 653
Andree (Richard), Ethnological Parallels, 229
Andrews (General), Ship Railways, 108
Andries (Dr. B.), the Cold Period of May, 286
Andromedæ, Spectrum of R, Espin, 656
Anemometer Comparisons, Prof. H. A. Hazen, 117
Anemometer Experiments, Prof. C. F. Marvin on, 189, 383
Angot (M.), Paris Central Meteorological Office, 421
Animals, do they Count?, Dr. H. A. Hagen, 319
Animals, the Force of Example in, 461
Annenkoff (General), Colonization of Transcaspian Region, 230
Annuaire de l'Observatoire Municipal de Montsouris, 654
Ansaloni (A.), on the Eiffel Tower, 261
Antherozoids of Cryptogams, Alfred W. Bennett on the, 610
Anthony's Photographic Bulletin, the International Annual of, 245
Anthrax Virus in Subcutaneous Tissues of Rabbits, Destruction of, M. Pekelharing, 312
Anthropology: Colour of Eyes and Hair of the Ainos, Lefèvre, 68; Osteology of Veddahs of Ceylon, Arthur Thompson, 118; the Anthropological Institute, 110, 287; the Anthropological Society, 215; Colour of Eyes and Hair in Norway, Abbo and Faye, 285; Introduction à l'Étude des Races Humaines, A. De Quatrefages, 407; the German Congress on Anthropology, 479; Anthropological Society of Bombay, 480; Prof. Sir William Turner's Opening Address in Section H at the British Association, 526; the Huron-Iroquois of Eastern Canada, Sir Daniel Wilson, 557; Lake-dwellings in Northern Italy, P. Castelfranco, 562; Pagan Practices among Modern Provençals, Dr. Férand, 562; Prof. Haddon's Torres Straits Collection, 626; W. K. Sibley, on Left-leggedness, 632; Prof. D. J. Cunningham, on the Occasional Eighth True Rib in Man, 632; Paul B. du Chaillu, on the Vikings as the Direct Ancestors of the English-speaking Nations, 632; Canon Isaac Taylor, on the Origin of the Aryans, 632; Canon Isaac Taylor, on the Ethnological Significance of the Beech, 632; Hyde Clarke, on the Right of Property in Trees on Another's Land, 635; Dr. Garson, on an Anthropometric Instrument for Travellers, 633; Francis Galton, F.R.S., on an Instrument for measuring the Reaction Time to Sight and Sound Signals, 633; Dr. MacLaurin, on the British Race in Australia, 633; H. H. Risley, on the Study of Ethnology in India, 633; Prof. A. C. Haddon, on the Customs and Beliefs of the Torres Straits Islanders, 633; Dr. J. Beddoe, F.R.S., on the Natural Colour of Skin in Certain Oriental Races, 633; Dr. Fridtjof Nansen, on the Esquimaux, 633; Rev. G. Rome Hall, on Northumberland in Prehistoric Times, 633; Sir William Turner, F.R.S., on Implements of Stags' Horns associated with Whales' Skeletons found in the Carse Lands of Stirling, 634; on the Principles and Methods of Assigning Marks for Bodily Efficiency in the Examination of Candidates for Public Service, Francis Galton, F.R.S., 631, 649; A. A. Somerville, 652; Anthropometric Instrument for Travellers, Dr. Garson on an, 633: Anthropometric Measurements at Cambridge, 593; Scientific Anthropometry and Artistic Proportions, Colonel Duhousset and Topinard, 562
Anthropopithecus calvus, the Mental Faculties of, Prof. Geo. J. Romanes, F.R.S., 160
Antiparallel, on the Use of the Word, E. M. Langley, 460
Antiquities discovered in Gothland, 254
Antoine (Ch.), Dilatation and Compression of Carbonic Acid, 48
Apes, the Large Bones of the Anthropoid, Etienne Rollet, 287
Apple and Pear Conference, the, 577
Applied Mechanics, Dr. A. Low, 31
April Meteors, 15
Aquatic Habits of certain Land Tortoises, R. W. Shufeldt, 641
Arc, the Peruvian, 558
Arcangeli (Prof.), Heat due to Respiration of Fungi, 334
Archæology in Mexico: Governmental Measures for Study and Preservation of Ancient Monuments and Historical Remains, 283
Archæology: the Burying-grounds and Civilization of Hallstatt, Dr. Hornes, 286
Arctic Expedition, Return of the Bremen, 539
Arctic Exploration: Dr. Nansen's Journey across Greenland, 103
Argentine Republic, Hibernation of Martins in the, Tommaso Salvadori, 223
Argûs, Variable η, Dr. Thome, 550
Argyll (the Duke of, F.R.S.), an Unusual Geological Sequence, 642
Arithmetic: a Course of Easy Arithmetical Examples for Beginners, J. G. Bradshaw, 293
Armstrong (Prof. H. E., F.R.S.): the Hydration of Cyanides, 335; Report to the British Association of the Committee on the Teaching of Science in Schools, 554; Suggestions for a Course of Elementary Instruction in Physical Science, 600; the Teaching of Science, 645
Arnold (Sir Edwin) upon Icebergs, 536
Artesian Wells in Australia, 305
Aryans, the, De Lapouge, 68
Aryans, the Origin of the, Canon Isaac Taylor on, 632
Ashe (Dr. Isaac), Dimidium, an Attempt to represent the Chemical Elements by Physical Forms, 588
Asia, Central: M. Bonvalot's Tour in, 483; Return of Yadrintzeff's Expedition, 551
Aspinall (Rev. C.), the Inhabitants of Tierra del Fuego, 374
Assmann (Dr. R.), the Structure of Hoar-frost, 285; Meteorological Experiences in the Sentis, 660
Association for Improvement of Geometrical Teaching, 326
Astrarchia stephaniæ, Dr. A. B. Meyer, 461
Astronomy: April Meteors, 15; the White Spot on Saturn's Ring, Prof. Holden, 15; the Variable X Cygni, Mr. Vendall, 15; Photographic Determination of the Brightness of the Stars, 15; Astronomical Column, 15, 63, 109, 135, 164, 180, 209, 231, 255, 284, 307, 329, 424, 448, 482, 538, 550, 597, 655; Astronomical Phenomena for the Week, 16, 46, 64, 86, 109, 135, 164, 181, 210, 231, 255, 284, 307, 329, 352, 374, 403, 424, 448, 482, 516, 538, 550, 578, 628, 656; the Residuals of Mercury, O. T. Sherman, 63; Right Ascensions of North Circumpolar Stars, Prof. T. H. Safford, 63; Two Remarkable Solar Eruptions, Father Jules Fényi, 64; Comet 1889 *b* (Barnard, March 31), 64; on the Determination of Masses in Astronomy, R. A. Gregory, 80; the Proposed Vatican Astronomical Observatory, 84; Meteor-Showers, 16, 46, 86, 109, 136, 165, 181, 231, 256, 285, 308, 329, 352, 375, 403, 424, 448, 483, 516, 539, 551, 578, 598, 629, 656; Variable Stars, 16, 45, 64, 85, 110, 135, 165, 181, 210, 231, 256, 284, 308, 329, 352, 375, 403, 424, 449, 483, 516, 539, 550, 578, 598, 629, 656; Barnard's Comet, 1888 *e*, 109; the Motion of Stars in the Line of Sight, Prof. H. C. Vogel, 109; the Latitude of Detroit, Dr. Ludovic Estes, 109; the Minor Planet Victoria, 109; Meridian Observations of Iris,

109; Preliminary Report of the Newall Telesope Syndicate, 114; Astronomical Society, 119; New Minor Planet, 135; the Spectrum of χ Cygni, 135; Solar Phenomena for 1888 and 1889, Tacchini, 144; Stonyhurst College Observatory, 164; Stability of Solar System, D. Eginitis, 167; Two Remarkable Conjunctions, Marth, 180; the General Relations of the Phenomena of Variable Stars, S. C. Chandler, 181; Stellar Evolution and its Relation to Geological Time, James Croll, F.R.S., A. Fowler, 199; Recent Determinations of the Amount of Lunar Radiation, Prof. C. C. Hutchins, 209; Astronomical Society of the Pacific, 231; a New Comet, 231; the Planet Uranus, R. A. Gregory, 235; Proposed New Telescope for Harvard University Observatory, 252; Death of Maria Mitchell, 253; Congress on Celestial Photography, 252; Obituary Notice of Prof. G. Cacciatore, 255; Comet 1889 *d* (Swift), 255; Comet 1889 *b* (Barnard, March 31), 255; Comet 1889 *c* (Barnard, June 23), 255; Comet 1889 *e* (Barnard, September 2), 255; Comet 1889 *d* (Brooks, July 6), 284; Babylonian Astronomy, G. Bertin, 237, 261, 285, 360; Celestial Motions, a Handy Book of Astronomy, William Thynne Lynn, 293; the Binary γ Coronæ Borealis, Prof. Celoria, 307; Eclipses and Transits in Future Years, Rev. S. J. Johnson, 307; the White Spot on Saturn's Ring, M. Terby, 307; Comet 1889 *c* (Barnard, June 23), Dr. R. Spitaler, 307; Discovery of a New Comet 1889 *e*, 328; Comet 1889 *d* (Brooks), Comets 1888 *e* (Barnard, September 2), and 1889 *b* (Barnard, March 31), 329; the Vienna Observatory, 329; Astronomy at Johns Hopkins University, 351; the Variations of Latitude in the Solar Spots, R. Wolf, 383; Another Photographic Survey of the Heavens, 417; Comet 1889 *d* (Brooks, July 6), Herr Otto Knopf, 424; Comet 1889 *e* (Davidson), Dr. Becker, 424; New Minor Planets, 424; New Double Stars, Burnham, 424; Stars with Remarkable Spectra, 424; Telescopes for Stellar Photography, Sir Howard Grubb, F.R.S., 441, 645; International Congress at Liége, 445; Yale College Observatory, 448; New Minor Planet, Prof. Peters, 448; Comet 1889 *d* (Brooks, July 6), Dr. K. Zelbr, 448; Comet 1888 *e* (Barnard, September 2), and 1889 *b* (Barnard, March 31), 448; Reduction of Rutherfurd's Photographs of the Pleiades and Præsepe, Dr. B. A. Gould, 448; the United States Eclipse Expedition, 462; the Triple Star Σ 2400, 482; Publications of the Potsdam Observatory, 482; the Observation of Sudden Phenomena, 482; International Congress of Astronomy, 516; Observations of Twilight and Zodiacal Light during the Total Eclipse of the Sun, December 21, 1889, Prof. Cleveland Abbe, 519; Bishop's Ring and Allied Phenomena, T. W. Backhouse, 519; Comet 1889 *e* (Davidson), 538; Observations at Algiers Observatory, Ch. Trépied, 539; Mr. Tebbutt's Observatory at Windsor, New South Wales, 550; the Variable η Argûs, Dr. Thome, 550; Rotation Period of the Sun, Henry Crew; Comet 1889 *d* (Brooks, July 6), Dr. Otto Knopf, 550; Prof. A. W. Rücker, F.R.S, on Cometic Nebulæ, 583; Astronomical Observatories, Geo. H. Boehmer, 597; a Spectroscopic Survey of Southern Stars, R. L. J. Ellery, F.R.S., 597; Astro-photographic Conference, 597; International Congress on Celestial Photography, 597; the Natal Observatory, 655; Spectrum of R Andromedæ, Rev. T. H. E. C. Espin, 656; Comet 1889 *d* (Brooks, July 6), 656 (*see also* Stars *and* Meteors)

Athecæ, Phenacodus and the, Lydekker on, Prof. E. D. Cope, 298

Atlantic, North: Pilot Chart for May, 107; Icebergs in, 133; Surface Currents of, Prince Albert of Monaco, 167; for May, Meteorology of, 179; Meteorology of, 305; Pilot Chart of, 401; Currents of, G. Pouchet, 577; Pilot Charts of, 578, 595

Atlantic Ocean, Upper Wind Currents over the Equator in the, Hon. Ralph Abercromby, 101; E. Foulger, 224

Atlas: Longmans' New, 148; W. and A. K. Johnston's the Unrivalled, 221

Atlas, Travels in the, and Southern Morocco, Joseph Thomson, 149

Atmosphere, Circulation of the, over the Equator, Hon. Ralph Abercromby, 297

Atmospheric Electricity, C. A. C. Bowlker, 55; Daniel Pidgeon, 77; C. Tomlinson, F.R.S., 102; R. T. Omond, 102; Marshall Hall, 125; Alexander McAdie, 223; Prof. C. Michie Smith, 585

Atoms and Molecules, the Organization of, Prof. A. E. Dolbear, 419

Audubon Monument, the Proposed, 305

August Perseids of 1889, 420

Aurora, the, Dr. M. A. Veeder, 318

Aurora, Observations on Height of, 654

Aurora, the Wave-length of Principal Line in Spectrum of, W. Huggins, F.R.S., 68

Aus dem Archiv der Deutschen Seewarte, 401

Auspitz (Rudolf) and Richard Lieben, Untersuchungen über die Theorie des Preises, 242

Austen (Dr. P. T.), Experiments on Combustion in Nitric Acid Vapour, 45

Australia: Records of the Geological Survey of New South Wales, 254; Western Australia, Coal and Tin Discoveries in, H. P. Woodward, 304; Exploration of, Ernest Favenc, 353; Artesian Wells in Australia, 305; Proposed Exploration of Central, 308; the Tertiary Flora of, C. von Ettingshausen, J. Starkie Gardner, 517; Tietken's Exploration of the Interior of South, 551; Dr. MacLaurin on the British Race in Australia, 633

Avalanche on Jöser Fjord, 229

Avarian Language, Baron Uslar, 283

Avens, Martel and Gaupillat, 636

Babylonian Astronomy, G. Bertin, 237, 261, 285, 360

Babylonian the Language of Polite Society in the Fifteenth Century B.C., Prof. Sayce, 239

Bacillus ethaceticus, a New Ferment, Prof. P. F. Frankland, 588

Backhouse (T. W.): Bishop's Ring and Allied Phenomena, 519; Shining Night Clouds—an Appeal for Observations, 594

Bacteria, the Ferment Action of, Drs. Lauder Brunton and Macfadyen, 21

Bacteria, Influence of Salt on, Forster, 216

Bailey (G. H.), Zirconium, 92

Bailey (James Blake), an Index to Science, 245

Bailey (Prof. W. Whitman), Changed Environment, 297

British Association :—Dinner to the President-Elect, 106 ; Meeting at Newcastle-on-Tyne, Preliminary Arrangements, 329, 349, 373, 462 ; Inaugural Address by Prof. W. H. Flower, F.R.S., President, 463 ; Social Arrangements, 485 ; the Secretaryship, 485 ; Places of Meeting for 1890, 1891, 1892, 485 ; Attendance at, 485 ; Grants, 485 ; Second Report of the Committee Appointed for Collecting Information as to the Disappearance of Native Plants from their Local Habitats, Prof. Hillhouse, 533 ; Report of the Committee appointed for the Purpose of Co-operating with the Scottish Meteorological Society in Making Meteorological Observations on Ben Nevis, A. Buchan, 535 ; Prof. Sir. William Thomson, F.R.S., on Boscovich's Theory, 545 ; Eighteenth Report of the Committee on the Rate of Increase of Underground Temperature downwards in Dry Land and under Water, Prof. Everett, 551 ; Report of the Committee for Investigating the Best Methods of Ascertaining and Measuring Variations in the Value of the Monetary Standards, Prof. F. Y. Edgeworth, 553 ; Second Report of the Committee for Reporting on our Knowledge of the Zoology and Botany of the West India Islands, and for Taking Steps to Investigate Ascertained Deficiencies in the Fauna and Flora, D. Morris, 553 ; Fifth Report of the Committee for Considering the Best Means of Comparing and Reducing Magnetic Observations, Prof. W. Grylls Adams, F.R.S., 554 ; Fourth Report of the Committee Appointed for the Purpose of Promoting Tidal Observations in Canada, Prof. A. Johnson, 554 ; Report of the Committee on the Teaching of Science in Elementary Schools, Prof. H. E. Armstrong, F.R.S., 554 ; Report of the Committee on Electrical Standards, R. T. Glazebrook, F.R.S., 555 ; Report on the Present State of our Knowledge in Electrolysis and Electro-Chemistry, W. N. Shaw, 555 ; Report of the Committee on the Observations on the Migration of Birds made at Light-houses and Light-vessels, John Cordeaux, 556 ; Report of the Committee on the Seasonal Variations of Temperature in Lakes, Rivers, and Estuaries, in the United Kingdom, Dr. H. R. Mills, 556 ; Report of the Committee on Solar Radiation, 556 ; Report of the Committee for the Investigation of the Natural History of the Friendly Islands and other Islands in the Pacific, S. F. Harmer, 556 ; Physical Papers at the, 583 ; Section Work at the, Prof. Oliver J. Lodge, F.R.S., 593

Section A (*Mathematics and Physics*)—Opening Address by Captain W. de W. Abney, C.B., F.R.S., President of the Section, 469 ; Prof. Sir William Thomson, F.R.S., on Boscovich's Theory, 545 ; Prof. A. W. Rücker, F.R.S., on Cometic Nebulæ, 583 ; Prof. C. Piazzi Smyth, on Re-examination of the Spectra of Twenty-three Gas-Vacuum End-on Tubes after Six to Ten Years of Existence and Use, 584 ; Lord Rayleigh, Sec. R.S., on the Tones of Bells, 584 ; Captain Abney, F.R.S., on the Quantity of Deposit of Silver Produced by the Development on a Photographic Plate in Terms of the Intensity of Light Acting, 584 ; Lord Rayleigh, Sec. R.S., on Pin-hole Photography, 584 ; Prof. O. J. Lodge, F.R.S, and R. T. Glazebrook, F.R.S., on the Determination of v by Means of Electric Oscillations, 584 ; Prof. A. W. Rücker, F.R.S., on the Instruments Used in the Recent Magnetic Survey of France, 584 ; Prof. J. A. Ewing, F.R.S., on the Magnetic Viscosity of Iron, 584 ; Prof. Everett, F.R.S., on the Relation between Brachistochrones and Ray-paths, 584 ; Prof. J. A. Ewing, F.R.S., on Hysteresis in the Relation of Strain to Stress, 584 ; Prof. Henry Stroud, on the E.M.F. Produced by an Abrupt Variation of Temperature at the Point of Contact of Two Portions of the same Metal, 585 ; Prof. McLeod, F.R.S., on the Black-bulb Thermometer *in vacuo*, 585 ; Sir W. Thomson, F.R.S., on Electrification of Air by Combustion, 585 ; Prof. C. Michie Smith, on Atmospheric Electricity and the Use of Sir W. Thomson's Portable Electrometer, 585 ; A. W. Clayden, on Dark Flashes of Lightning, 585 ; Prof. Cleveland Abbe, on the Determination of the Amount of Rainfall, 585 ; Prof. C. Piazzi Smyth, on Hygrometry in the *Meteorological Journal*, 585 ; F. T. Trouton, on some Experiments on Radiation with Prof. Hertz's Mirrors, 585 ; Profs. A. W. Rücker, F.R.S., and T. E. Thorpe, F.R.S., on the Relation between the Geological Constitution and the Magnetic State of the United Kingdom, 585 ; Prof. Arthur Schuster, F.R.S., on

the Passage of Electricity through Gases, 585; Prof. Oliver J. Lodge, F.R.S., on the Failure of Metal Sheets to Screen off the Electrostatic Effect of Moving or Varying Charges, 586; Prof. James Blyth, on a New Form of Current-Weigher, 586; Prof. S. P. Thompson, on a Phenomenon in the Electro-Chemical Solution of Metals, 586; J. Wilson Swan, on Chromic Acid as a Depolarizer in Bunsen's Battery, 586; Prof. Perry, F.R.S., on a Variable Standard of Self-Induction, 586; Prof. Perry, F.R.S., on a Hot Twisted Strip Voltmeter, 586; W. H. Preece, F.R.S, on the Relative Effects of Steady and Alternate Currents on Different Conductors, 586; Prof. G. Forbes, F.R.S., and W. H. Preece, F.R.S., on a New Thermometric Scale, 587; Prof. S. P. Thompson on Sparkless Electro-Magnets, 587; W. W. Haldane Gee and Dr. Arthur Harden on Stereometry, 587; W. W. Haldane Gee and Hubert L. Terry, on the Specific Heat of Caoutchouc, 587; F. T. Trouton, on the Temporary Thermo-Currents in Iron, 587

Section B (*Chemistry*)—Opening Address by Sir Lowthian Bell, Bart., F.R.S., President of the Section, 473; on the Influence of Silicon on the Properties of Steel, 587; J. W. Hogg, on the Volatilization of Lead Oxide and its Action upon Glass at Low Temperatures, 587; Prof. Liveing, on a New Developer, Eikonogen, 587; C. T. Heycock and F. H. Neville, on Raoult's Method Applied to Alloys, 587; Prof. Bedson, on Dr. Netto's Process for the Manufacture of Aluminium from Cryolite, 587; Dr. Richardson, on the Action of Light on the Hydracids, 587; Dr. Richardson, on a New Self-Registering Actinometer, 587; Prof. H. B. Dixon, F.R.S., on the Explosion of a Mixture of Hydrogen, Chlorine, and Oxygen, 587; Dr. Isaac Ashe, Dimidium, an Attempt to Represent the Chemical Elements by Physical Forms, 588; Prof. P. F. Frankland, on a New Ferment, 588

Section C (*Geology*)—Opening Address by Prof. James Geikie, LL.D., F.R.S., President of the Section, 486; Prof. Milne's Ninth Report on the Earthquake and Volcanic Phenomena of Japan, 608; Dr. A. Geikie, F.R.S., on the Crystalline Schists of Norway, 608; Dr. Fridtjof Nansen, on the Geology of Greenland, 608; Prof. W. C. Williamson, F.R.S., on Coal and Mineral Charcoal, 608; Prof. E. Hull, F.R.S., on Coal-like Structures from the Limestone of Culdaff, 608; Mr. Ussher on the Devonian Rocks of Britain, 608; Profs. Thorpe and Rücker, on the Relation between the Geological Constitution and Magnetic State of the British Isles, 609; Pleistocene Papers, 609; Mr. R. H. Tiddeman, on Concurrent Faulting and Deposit in Carboniferous Times, 609

Section D (*Biology*)—Opening Address by Prof. J. S. Burdon Sanderson, M.A., M.D., F.R.S., President of the Section, 521; Prof. G. J. Romanes, F.R.S., on Specific Characters as Useful and Indifferent, 609; Alfred W. Bennett, on the Antherozoids of Cryptogams, 610; E. B. Poulton, F.R.S., the Supposed Transmission of Acquired Characters, 610; Francis Galton, F.R.S., on Feasible Experiments on the Possibility of Transmitting Acquired Habits by Means of Inheritance, 610; Prof. F. O. Bower, on the Meristems of Ferns as a Study in Phylogeny, 610; Prof. Hartog, on the Structure of Saprolegnia, 611; F. E. Beddard, on Fresh-water Oligochæta, 611; Messrs. Robert Irvine and Dr. G. Sims Woodhead, on the Secretion of Carbonate of Lime by Animals, 611; Sir John Lubbock, F.R.S., on the Shape of the Oak Leaf and the Leaves of the Guelder Rose, 611; Sir W. Turner, F.R.S., on the Placentation of the Dugong, 611

Section E (*Geography*)—Opening Address by Colonel Sir Francis de Winton, President of the Section, 492; Dr. Hugh Robert Mill, on the Physical Basis of Commercial Geography, 629; Captain E. C. Hore, on Tanganyika, 629; W. M. Flinders Petrie, on Wind Action in Egypt, 629; Dr. H. B. Guppy, on the South Coast of West Java, 630; H. Guillaume, on Peru and Bolivia, 630

Section F (*Economic Science and Statistics*)—Opening Address by Prof. F. Y. Edgeworth, M.A., F.S.S., President of the Section, 496

Section G (*Mechanical Science*)—Opening Address by William Anderson, M.Inst.C.E., 509; Alex C. Humphreys, on Water-gas in the United States, 630; Killingworth Hedges, on Electric Lighting, 630; Prof. G. Forbes, F.R.S., on Electric Launches on the Thames, 630; Edward Manville, on Series Electric Traction (Northfleet Tramways), 630; W. H. Preece, F.R.S., on Telephonic Communication between London and Paris, 631; W. Webster, on the Purification of Sewage by Electrolysis, 631; Prof. W. C. Unwin, F.R.S., on the Strength of Alloys at Different Temperatures, 631; W. W. Phipson, on Central Station Heating and Power Supply, 631; Alex. P. Trotter, on a Curve Ranger, 631; W. H. Wheeler, on the Transporting Power of Water in the Deepening of Rivers, 631

Section H (*Anthropology*)—Opening Address by Sir William Turner, M.B., F.R.S., President of the Section, 526; Francis Galton, F.R.S., on Assigning Marks for Bodily Efficiency in the Examination of Candidates for Public Service, 631, 649; W. K. Sibley, on Left-leggedness, 632; Prof. D. J. Cunningham, on the Occasional Eighth True Rib in Man, 632; Paul B. du Chaillu, on the Vikings as the Direct Ancestors of the English-speaking Nations, 632; Canon Isaac Taylor, on the Origin of the Aryans, 632; Canon Isaac Taylor, on the Ethnological Significance of the Beech, 632; Hyde Clarke, on the Right of Property in Trees on Another's Land, 635; Dr. Garson, on an Anthropometric Instrument for Travellers, 633; Francis Galton, F.R.S., on an Instrument for measuring the Reaction Time to Sight and Sound Signals, 633; Dr. MacLaurin, on the British Race in Australia, 633; H. H. Risley, on the Study of Ethnology in India, 633; Prof. A. C. Haddon, on the Customs and Beliefs of the Torres Straits Islanders, 633; Dr. J. Beddoe, F.R.S., on the Natural Colour of Skin in certain Oriental Races, 633; Dr. Fridtjof Nansen, on the Esquimaux, 633; Rev. G. Rome Hall, on Northumberland in Prehistoric Times, 633; Sir William Turner, F.R.S., on Implements of Stags' Horns associated with Whales' Skeletons found in the Carse Lands of Stirling, 634

Carboniferous Times, Concurrent Faulting and Deposit in, R. H. Tiddeman, 609
Carbons, Heat of Combustion of, Berthelot and Petit, 167
Carhart (H. S.): Magnetic Leakage in Dynamos, 559; Improved Clark Standard Cell with Low Temperature Coefficient, 559
Carpenter (Wm. Lant), Taming the Puma, 542
Carr (Henry), Key to Lock's Elementary Trigonometry, 125
Carruthers (Mr.), Portraits of Linnæus, 106
Cartailhac (M.), the Gold of Ancient Gaul, 285
Cascade Mountains, Ascent of Mount Rigi in, Dr. Julius Röll, 598
Casey (Dr. J., F.R.S.), a Treatise on Spherical Trigonometry, 342
Castelfranco (P.): Lake-Dwellings in Northern Italy, 562; the Stone Age in Italy, 659
Cataloguing, Classified: W. M. Flinders Petrie, 392; Dr. Jas. Lewis Howe, 644
Cats: Do they Count?, J. T. Walker, 394; the Force of "Example" in Animals, 461
Caucasia, Absence of Squirrels in, E. Büchner, 286
Cave-Dwellers in Mexico, Discovery of, by Lieutenant Schwatka, 208
Cayman Islands, Botany of the, W. Fawcett, 15
Celestial Motions: a Handy Book of Astronomy, William Thynne Lynn, 293
Celestial Photography, Congress on, 252, 597
Celluloids, on the Explosiveness of the, Charles Munro, 558
Celoria (Prof.), the Binary γ Coronæ Borealis, 307
Census, the Swiss, 538
Centenarian Graduates of American Colleges, W. H. Tillinghurst, 284
Centrifugal Force and D'Alembert's Principle, Prof. F. Guthrie, 320
Ceylon, Entomological Tour in, by Herr Frühstorfer, 480
Chaillu (Paul B. du), on the Vikings as the Direct Ancestors of the English-speaking Nations, 632
Challenger Expedition, Zoological Results of the, 171
Chambers's Encyclopædia, vol. iv., 619
Champernowne (Arthur), the Ashprington Volcanic Series of South Devon, 94
Chandler (S. C.), the General Relations of the Phenomena of Variable Stars, 181
Changed Environment, Prof. W. Whitman Bailey, 297
Channel Bridge, the Proposed, Schneider and Co., and Hersent, 536, 560
Chapman (Abel), Bird Life of the Borders, 147
Characeæ, Systematic Position of the, Alfred W. Bennett, 298
Characters, Specific, as Useful and Indifferent, Prof. G. J. Romanes, F.R.S., on, 609
Characters, on the Supposed Transmission of Acquired, E. B. Poulton, F.R.S., 610
Charcoal, Mineral, Coal and, Prof. W. C. Williamson, F.R.S., on, 608
Charleston, Earthquake at, 283
Chartres (R.), Delambre's Analogies, 644
Chatelier (H. Le), Expansion of Quartz, 118
Chauveau (A.): Transformism in Micro-biology, 612; Transformism in Pathogenic Micro-biology, 636
Chelonian Remains from Wealden and Purbeck, R. Lydekker, 238
Chemistry: a New Amine, Drs. Skraup and Wiegmann, 14; the Rate of Dissolution of Metals in Acids, V. H. Veley, 22; the Chemical Society, 22, 94, 166, 214, 335; the Thionic Series, Researches on, Marcellin Berthelot, F.R.S., 23, 71, 95; Combinations of Ruthenium with Nitric Oxide, A. Joly, 23; a Treatise on Chemistry (vol. iii. Part v.), Sir H. E. Roscoe, M.P., F.R.S., and C. Schorlemmer, F.R.S., 31; Experiments on Combustions in Nitric Acid Vapour, Dr. P. T. Austen, 45; Dilatation and Compression of Carbonic Acid, Ch. Antoine, 48; the Formation of Nitrogenous Earths, Müntz and Marcano, 48; Chemical Analysis of Iron, Andrew Alexander Blair, 51; Synthetization of Uric Acid, Drs. Behrend and Roosen, 62; the New Element Gnomium, 67; Chemical Action between Solids, William Hallock, 68; Application of Measurement of Rotatory Power to Study of Neutral Molybdate and Tartaric Acid Compounds, D. Gernez, 71; the Accurate Determination of Carbonic Acid and Moisture in Air, J. S. Haldane and M. S. Pembrey, 70; Atomic Weight of Ruthenium, A. Joly, 72; α-Oxycinchonine, Jungfleisch and Léger, 72; Chemistry of Ocean Currents, Dr. John Gibson, 84; Composition of Bromide of Sulphur, Dr. Buchka, 85; Heat-producing Powers of Different Coals compared with their Chemical Composition, W. Thompson, 86; Zirconium, G. H. Bailey, 92; Boiling-point of Sodium and Potassium, E. P. Perman, 94; Heat of Neutralization of Sulphuric Acid, S. U. Pickering, 94; Thiophosphoryl Fluoride, Thorpe and Rodger, 94; Oxalomolybdic Acid discovered by M. Céchard, 107; Proportion of Nitrates in Rains of Tropical Regions, Müntz and Marcano, 119; New Aromatic Compounds of Bismuth, Michaelis and Marquardt, 134; Relation between Density and Refraction of Gaseous Elements, Rev. T. P. Dale, 143; the Nature of Solutions, S. U. Pickering, 166; the Expansion of Liquids, S. U. Pickering, 166; the Formation of Phenylindoles, Dr. W. H. Ince, 166; the Magnetic Rotation of Nitrogen Compounds, Dr. W. H. Perkin, F.R.S., 166; the Alleged New Element, Gnomium, Dr. Fleitmann, 208; Amylo-dextrin, Brown and Morris, 214; Experimental Researches on the Periodic Law, Dr. B. Brauner, 214; Determination of Molecular Weights of Carbohydrates, Brown and Morris, 214; Vapour Pressures, &c., of Similar Compounds of Elements in Relation to Periodic System, Prof. S. Young, 215; Isomerism of Alkyl-derivatives and Mixed Diazoamido Compounds, Meldola and Streatfield, 215; the Atomic Weight of Zinc, Gladstone and Hibbert, 215; the Analysis of Rain Water, R. Warrington, 215; the Molecular Action of Dissolved Substances, Lorenz, 216; the Occlusion of Gases in Electrolysis of Sulphate of Copper, A. Soret, 239; Heat of Formation of Hyponitrites, Berthelot, 239; the Condition of Matter near the Critical Point, Cailletet and Collardeau, 239; M. Leidié on a New Series of Double Oxa-

lates of Rhodium, 254; Chemical Affinity, M. M. Pattison Muir, 273; Use or Abuse of Empirical Formulæ, and of Differentiation, by Chemists, Prof. Oliver J. Lodge, F.R.S., 273; Tellurium, Dr. Brauner, 284; a New Test for Bromine, F. Swarts, 286; the Solidification of Nitrous Acid, Fl. Birhans, 287; an Oxybromide of Copper analogous to Atacamite, Et. Brun, 287; a New Reaction for Cholesterin, Dr. Obermüller, 288; a New Dioxide of Cobalt, M. Rousseau, 307; the Brounian Movement, M. Gouy, 311; an Extreme Case of "Mass" or "Catalytic" Action, Morse and White, 328; Monobenzyl-derivatives of Phenylenediamines, Meldola and Coste, 335; Yellow Pigment in Butterflies, F. G. Hopkins, 335; the Hydration of Cyanides, Prof. H. E. Armstrong, 335; Quantitative Analysis of Bicarbonate of Soda in Milk, L. Padé, 336; Action of Propionyl and Butyryl Chloride on Phenol, Dr. W. H. Perkin, F.R.S., 335; Melting-point of Salicylic and Anisic Compounds, Dr. W. H. Perkin, F.R.S., 335; Inorganic Chemistry, Ira Remsen, 339; Use or Abuse of Empirical Formulæ, and of Differentiation, by Chemists, Spencer Pickering, 343; an Attempt to apply to Chemistry one of the Principles of Newton's Natural Philosophy, Prof. D. Mendeleeff, 354; the International Chemical Congress, 369, 394; the Use of the Prefixes bi- and di-, 370; the Use of the Suffix -ol, 370; Ketones and the Nomenclature of the Acetones, 370; the Nomenclature of Cyanogen, 370; M. Chabrié on Sulphur Compounds, 370; Ring-Formulæ containing Nitrogen, 370; Nomenclature of Naphthalene, 370; M. Combes on Benzene, 370; an Elementary Textbook of Chemistry, William G. Mixter, 389; Electrolysis of Potassium Iodide, E. F. Mondy, 417; Sir Lowthian Bell, F.R.S., on the Manufacture of Iron, 473; Agricultural Chemistry, Influence of Gypsum Soil on Fixation, &c., of Nitrogen, Péchard, 539; Agricultural Chemistry, Relations between Physical Characters of Plants and Proportion of Elements of Fertility in Soil, G. Ville, 659; Agricultural Chemistry, the Fixation of Atmospheric Nitrogen, M. Berthelot, 539; Agricultural Chemistry, the Nitrification of Ammonia, Th. Schlœsing, 539; Vice-Presidential Address of Prof. William L. Dudley at the American Association, 558; the Life-work of a Chemist, Sir Henry E. Roscoe, F.R.S., 578; Influence of Silicon on the Properties of Steel, 587; J. W. Hogg, on the Volatilization of Lead Oxide and its Action upon Glass at Low Temperatures, 587; Prof. Liveing, on a New Developer, Eikonogen, 587; C. T. Heycock and F. H. Neville, on Raoult's Method Applied to Alloys, 587; Prof. Bedson, on Dr. Netto's Process for the Manufacture of Aluminium from Cryolite, 587; Dr. Richardson, on the Action of Light on the Hydracids, 587; Dr. Richardson, on a New Self-Registering Actinometer, 587; Prof. H. B. Dixon, F.R.S., on the Explosion of a Mixture of Hydrogen, Chlorine, and Oxygen, 587; Dr. Isaac Ashe, Dimidium, an Attempt to Represent the Chemical Elements by Physical Forms, 588; Prof. P. F. Frankland, on a New Ferment, 588; Combinations of Cupric Oxides into Amylaceous Matters, &c., C. E. Guignet, 588; Teaching of Chemistry in Public Schools, 589; the Vapour-density of Aluminium Chloride, Profs. Nilson and Pettersson, 596; Present Method of Teaching Chemistry, 599; Observations on Reciprocal Displacement between Oxygen and the Halogens, M. Berthelot, 612; Raffinose, M. Berthelot, 612; Air in the Soil, Th. Schlœsing, *fils*, 626; Alloys, Heycock and Neville on, 628; Isolation of Methyl Hydrazine, Dr. Gustav von Brüning, 628; Reciprocal Displacements between Halogen Elements and Oxygen, Berthelot, 636; New Relations between Sugars and Furfuric Compounds, Maquenne, 636; Service Chemistry, Vivian B. Lewes, 639; Watts's Dictionary of Chemistry, Sir H. E. Roscoe, F.R.S., 640; Pinol, an Isomer of Camphor, Drs. Wallach and Otto, 655; on the Existence of Sulphate of Phosphonium, A. Besson, 659; Simultaneous Synthesis of Water and Hydrochloric Acid, Hautefeuille and Margottet, 659

Chervin, the Birth-rate in France, 92

Chester Society of Natural Science and Literature, 421

Chetham College, Technical Education at, 45

Chevalier (Père), Bulletin of the Sikawei Meteorological Observatory, 253

Chimpanzee's Humour, a, Harold Picton, 224

Chicken Cholera, Experiments with Microbes of, Dr. O. Katz, 401

China: Inclement Weather in, 179; the Trade of, 493; Priority of Chinese Inventions, 165

Chiriqui, Ancient Art of the Province of, W. H. Holmes, 437

Cholesterin, a New Reaction for, Dr. Obermüller, 288

Christiania Museum, Plants from Yemen presented to, by Dr. Schweinfurth, 254

Christie (Robert W. D.), Test of Divisibility by any Prime, 247

Chromic Acid as a Depolarizer in Bunsen's Battery, J. Wilson Swan, 586

Chronograph for Measuring Velocity of Projectiles, &c., Captain H. C. L. Holden, R.A., 66

Cidaris papillata, Dimorphism of Tentacles of, Prof. M. Duncan, 237

Circolo Matematico of Palermo, the, 316

Circulation of the Atmosphere over the Equator, Hon. Ralph Abercromby, 297

City of London College Science Society, 328

Civilization, History of Ancient, Rev. J. Verschoyle, 7

Clark (Richard), a Remarkable Meteor, 573

Clarke (F. W.), a New Occurrence of Gyrolite, 404

Clarke (Hyde), on the Right of Property in Trees on Another's Land, 633

Classified Cataloguing, W. M. Flinders Petrie, 392; Dr. Jas. Lewis Howe, 644

Claudel (Louis), the Colouring-Matter of the Spermoderm in Angiosperms, 384

Clay, Boulder, Bored Stones in, G. W. Lamplugh, 297

Clayden (A. W.): the Formation of Ocean Currents, 66; on some Photographs of Lightning and "Black" Electric Sparks, 262; on Dark Flashes of Lightning, 585

Clayton (H. H.), Diurnal and Annual Oscillations of Barometer, 445

Clerke (A. M.): Photographic Star-gauging, 344; Œuvres complètes de Christiaan Huygens, 591

Climate on Race, the Effect of, Dr. Alfredo da Luy, 423

Climatological Table of British Empire, 654

Clocks, Japanese, A. A. Rambaut, 86; V. Ball, F.R.S., 151

Clouds, Luminous Night, D. J. Rowan, 151

Clouds, Noctilucous, Prof. John Le Conte, 544

Clouds, Rain, on Lake Titicaca, Hon. Ralph Abercromby, 12; Dr. Julius Hann, 78

Clouds, Shining Night, an Appeal for Observations, T. W. Backhouse, 594

Coal Districts in Victoria, Proposed Government Survey of, 595

Coal and Mineral Charcoal, Prof. W. C. Williamson, F.R.S., on, 608

Coal and Tin Discoveries in Western Australia, H. P. Woodward, 304

Coals compared with their Chemical Composition, Heat-producing Powers of Different, W. Thompson, 86

Cobalt, a New Dioxide of, M. Rousseau, 307

Cobra in Indian and Chinese Folk-Lore, Alleged Avenging Habits of the, Dr. Macgowan, 423

Cockshott (A.) and Rev. F. B. Walters, a Treatise on Geometrical Conics, 390

Cod, Turtle-headed Rock, 77

Cod-Fisheries on the Coast of Finland, 254

Cod-Fishery, the Norwegian, 229

Coffee-Root Disease, the Brazilian, Dr. Gölde, 108

Cogwood, Jamaica, 162

Colardeau (E.) and L. Cailletet, the Condition of Matter near the Critical Point, 239

Colenso (William), Maori Folk-Lore, 596

College for Working Men and Women, Morley Memorial, 653

Colombia, Agriculture in, 423, 596

Colomès and Plumandon, Synoptic Table of Weather Prediction, 61

Colour, C. T. Whitmell, 518

Colour-Blindness and Defective Far-Sight among the Seamen of the Mercantile Marine, 438

Colour-Blindness, Testing of, Rev. J. F. Heyes, 572

Columbus, the Proposed Commemoration of the Work of, 548

Columnar Structure in Ice, T. D. La Touche, 35; Prof. T. G. Bonney, F.R.S., 55

Colymbosaurus, Structural Peculiarities of, Prof. H. G. Seeley, 653

Combustion of Carbons, Heat of, Berthelot and Petit, 167

Comets: a New Comet, E. E. Barnard, 231; Comet, Discovery of a New, 1889 *e*, 329; Comet 1889 *b* (Barnard, March 31), 64, 329, 448; Prof. Millosevich, 255; Comet 1889 *c* (Barnard, June 23), 307; Dr. H. Kreutz, 255; Comet 1888 *e* (Barnard, September 2), 109, 255, 329, 448; Comet 1889 *d* (Swift), Prof. Lewis Swift, 255; Comet 1889 *d* (Brooks, July 6), 284, 656; Dr. H. Oppenheim, 328; Dr. K. Zelbr, 448; Dr. Otto Knopf, 424, 550; Comet 1889 *e* (Davidson), 384, 424, 538; Dr. Becker, 424; Cometic Nebulæ, Prof. A. W. Rücker, F.R.S., on, 583
Commercial Geography, Dr. Hugh Robert Mill on the Physical Basis of, 629
Commercial Organic Analysis, Alfred H. Allen, Dr. C. R. Alder Wright, F.R.S., 289
Commissioners for the Exhibition of 1851, Proposals of the, 265; the Estate at Kensington, 367
Concurrent Faulting and Deposit in Carboniferous Times, R. H. Tiddeman, 609
Conductors, on the Relative Effects of Steady and Alternate Currents on Different, W. H. Preece, F.R.S., 586
Congo, Journeys of the Ngala and Aruwimi Tributaries of the, J. R. Werner, 65
Congress on Education, the, 548
Congress of Ethnographic Sciences, International, 547
Congress on Hygiene, International, 326, 350, 372

Abhandlungen aus dem geographischen Seminar der Universität Strassburg, Prof. Dr. Georg Gerland, 75; Bericht über die Entwickelung der Methodik und des Studiums der Erdkunde, Prof. Dr. Hermann Wagner, H. J. Mackinder, 75; Dr. Nansen's Journey across Greenland, 103; the Royal Geographical Society, 110; the Results of European Contact with other Parts of the World, General Strachey, 110; Eclectic Physical Geography, Russell Hinman, 149; the South Usuri Region, Colonel Nadaroff, 165; Outflow of the River Omo, Giulio Borelli, 165; Mr. Stanley's Movements in Africa, 181, 539; Dr. Schweinfurth's Journey to Hodeida, 182; the Vinland Voyages of Norse Colonists of Greenland, 182; Proposed Exploration of Interior of New South Wales, 182; Magnetic Survey of the Harz Mountains, Dr. Eschenhagen, 182; Dr. Nansen's Account of his Journey across Greenland, 210; Ascent of Summit of Owen Stanley Range, by Dr. Macgregor, 308; Sir William Macgregor's Ascent of Mount Owen Stanley, 449, 551; Dr. A. Hettner's Observations on Lake Titicaca, 308; Proposed Exploration of Northern Greenland, by Mr. A. Weston, 308; Proposed Exploration of Central Australia, 308; Taupin's Exploration of the Laos States, 352; Ernest Favenc's West Australian Explorations, 353; Lieutenant Kund on the Cameroons Interior, 353; the Tumuc-Humac Mountains of Guiana, 353; the River Omo, Borelli, 353; Colonel Labre's Explorations of Regions between Beni and Madre de Dios and Purus Rivers, 353; Prof. Wichmann's Explorations of Dutch East Indies, 353; Trip through District of Croajingolong, Baldwin and French, 421; Concession to British East Africa Company of Lamu and Ben Adir Coast, 449; Government Survey Map of India, 483; British Annexation of Humphrey and Rierson Islands, 483; Captain Grombchevsky's Expedition to Kafiristan, 483; M. Bonvalot's Tour in Central Asia, 483; Death of W. W. McNair, 483; Safety of Dr. Kukenthal, 483; Colonel Sir Francis de Winton's Opening Address in Section E at the British Association, 492; Return of Bremen Arctic Expedition, 539; New Map of Transvaal, Frederick Jeppe, 539; Tietken's Exploration of the Interior of South Australia, 551; Return of Yadrintzeff's Central Asian Expedition, 551; Travels in South Africa, Francis Galton, 570; the Barents Sea, Dr. Mohn, 598; Ascent of Mount Rigi in Cascade Mountains, Dr. Julius Röll, 598; Influence of Wind and Rain in Valley Formation, Herr Rucktäschel, 599; Rosset's Exploration of Indo-China, 599; Dr. Hugh Robert Mill, on the Physical Basis of Commercial Geography, 629; Captain E. C. Hore, on Tanganyika, 629; W. M. Flinders Petrie, on Wind Action in Egypt, 629; Dr. H. B. Guppy, on the South Coast of West Java, 630; H. Guillaume, on Peru and Bolivia, 630
Geology: London Geological Field Class, 13; Geological Photography, Osmund W. Jeffs, 34; Geological Society, 47, 94, 167, 238; the Production of Secondary Minerals at Shear-zones in Crystalline Rocks of Malvern Hills, Charles Callaway, 47; the Sigillaria, Grand'Eury, 48; a Cause of Contortions of Strata, Dr. Charles Ricketts, 67; the Formation of Siliceous Sinter by Vegetation of Thermal Springs, W. H. Weed, 68; Marine Shells in the Till near Boston, Warren Upham, 68; Stratigraphic Position of Olenellus Fauna, C. D. Walcott, 68; the Ashprington Volcanic Series of South Devon, Arthur Champernowne, 94; the Structure and Distribution of Coral Reefs, Dr. H. B. Guppy, 53, 102, 173, 222; Prof. T. G. Bonney, F.R.S., 77, 125, 222; W. Usborne Moore, 203, 271; Dr. John Murray, 222, 294; P. W. Bassett-Smith, 223;

the Old-Slate Formation of Borneo, Martin, 120; Systematic Account of the Geology of Tasmania, Robert M. Johnston, Prof. John W. Judd, F.R.S., 122; the Occurrence of Spines within Spines on Shells of Carboniferous Productidæ, John Young, 134; the Upper Jurassic Clays of Lincolnshire, Thos. Roberts, 167; Topographical Development of Triassic Formation of Connecticut Valley, W. M. Davis, 189; Contact Metamorphism in Silurian Rocks near New Galloway, S. Allport and Prof. Bonney, F.R.S., 190; Stellar Evolution and its Relation to Geological Time, James Croll, F.R.S., A. Fowler, 199; Zur Geologie der Schweizeralpen, Dr. Carl Schmidt, 220; the Westleton Beds of the East Anglian Coast, Prof. Joseph Prestwich, F.R.S., 238; on Certain Chelonian Remains from the Wealden and Purbeck, R. Lydekker, 238; Saxicava Borings and Valves in a Boulder Clay Erratic, T. Mellard Reade, 246; Records of the Geological Survey of New South Wales, 254; Recent Researches into the Origin and Age of the Highlands of Scotland and the West of Ireland, Dr. Archibald Geikie, F.R.S., 299, 320: the Olenellus Fauna in North America and Europe, 310; Geology in Systematic Notes and Tables for the Use of Teachers and of Taught, W. F. Gwinnell, 316; Geological and Natural History Survey of Minnesota, 373; Geology in Russia, 403; Mr. Griesbach appointed Government Geologist in Beloochistan, 444; on the Geological History of the Prehistoric Flora of Sweden, Dr. A. G. Nathorst, 453; Prof. James Geikie's Opening Address in Section C at the British Association, 486; Geology in India, 536; Proposed Geological Survey of Cape of Good Hope, 547; the Mesozoic Division of the Geological Record as seen in America, Charles White, 557; the Glacial Phenomena of North-East Illinois and North Indiana, Frank Leverett, 557; Cis- and Trans-Atlantic Formations Compared, Prof. H. S. Williams, 557; on the Relation between the Geological Constitution and the Magnetic State of the United Kingdom, Profs. A. W. Rücker, F.R.S., and T. E. Thorpe, F.R.S., 585, 609; Prof. Milne's Ninth Report on the Earthquake and Volcanic Phenomena of Japan, 608; Dr. A. Geikie, F.R.S., on the Crystalline Schists of Norway, 608; Dr. Fridjtof Nansen, on the Geology of Greenland, 608; Prof. W. C. Williamson, F.R.S., on Coal and Mineral Charcoal, 608; Prof. E. Hull, F.R.S., on Coal-like Structures from the Limestone of Culdaff, 608; Mr. Ussher, on the Devonian Rocks of Britain, 608; Pleistocene Papers, 609; Mr. R. H. Tiddeman, on Concurrent Faulting and Deposit in Carboniferous Times, 609; Polyzoa and Monticuligrora Discovered at Kirktonhelm, John Young, 627; the Cowdenglen Valley, James Rennie, 627; the Formation of Avens, Martel and Gaupillat, 636; an Unusual Geological Sequence, the Duke of Argyll, F.R.S., 642

Geometry: Elementary and Synthetic Geometry of the Point, Line, and Circle in the Plane, N. F. Dupuis, 100; a Manual of Practical Solid Geometry, W. Gordon Ross, 125; Greek Geometry from Thales to Euclid, Dr. G. J. Allman, F.R.S., 172; Association for the Improvement of Geometrical Teaching, 326; a Treatise on Geometrical Conics, A. Cockshott, Rev. F. B. Walters, 390; on the Use of the Word Antiparallel, E. M. Langley, 460; Solid Geometry, Prof. Kikuchi, 627

Germany: Anthropological Congress, 479; German Meteorological Society, 283; Meeting at Heidelberg of German Naturalists and Physicians, 252, 375; Foreign Students at the German Technical High Schools, 347; Geography in Germany, H. J. Mackinder, 75; Effect of the Tashkend Earthquake in, 283; Velocity of Propagation of Thunderstorms in South Germany, Dr. Lang, 283

Gernez (D.), Application of Measurement of Rotatory Power to the Study of Neutral Molybdate and Tartaric Acid Compounds, 71

Giard (A.), Phosphorescent Infection in Crustacea, 563

Gibier (Paul), the Vitality of Trichinæ, 588

Giglioli (Prof.), and Ornithology in Italy, 549

Hagen (Dr. H. A.), Do Animals Count? 319
Hail: Unusually Large, Prof. W. A. Herdman, 126; on the Theory of, C. Tomlinson, F.R.S., 203; Unusually Large Hailstones at Rock Ferry, 133; Note on some Hailstones that Fell at Liverpool on Sunday, June 2, 1889, Edward E. Robinson, 151; Miss C. D. Holt, 272; on the Remarkable Form of Hailstones, J. Shearson Hyland, 544
Haldane (J. S.), the Accurate Determination of Carbonic Acid and Moisture in Air, 70
Halifax, Proposed Fishery Intelligence Department at, 179
Hall (Rev. G. Rome), Northumberland in Prehistoric Times, 633
Hall (H. S.), and S. R. Knight, Key to Higher Algebra, 460
Hall (Marshall), Atmospheric Electricity, 125
Hallock (William), Chemical Action between Solids, 68
Hallstatt in Austria, its Burying-grounds and Civilization, Dr. Hörnes, 286
Halo of the Moon and Formation of Peculiarly-shaped Clouds at Oxford, Otto V. Darbishire, 55
Hamilton, Life of Sir W. R. (vol. iii.), R. P. Graves, 614
Hamilton (Prof. D. J.), Text-book of Pathology, 270
Hamy (Dr.), the Fossil Human Bones at Gourdon, 285
Hann (Dr. Julius), Rain-Clouds, 78
Harden (Dr. Arthur) and W. W. Haldane Gee, on Stereometry, 587
Hare (A. T.), Globular Lightning, 415
Harker (Allen), a New Pest of Farm Crops, 11
Harkness (Dr. William), the Progress of Science as Exemplified in the Art of Measuring and Weighing, 376
Harmer (S. F.): Report to the British Association on the Natural History of the Friendly Islands, and other Islands in the Pacific, 556; Marine Biological Association, 593
Harpur Euclid, E. M. Langley and W. S. Phillips, 365
Hartog (Prof. Marcus M.): Make-Believe, 299; Dogs and Fire, 299; on the Structure of Saprolegnia, 611
Hartog (M. P. J.), Researches on the Sulphites, 383, 384
Harvard College Observatory, Proposed New Telescope for, 252
Harveian Oration for 1889, 547
Harvie-Brown (J. A.), and T. E. Buckley, a Vertebrate Fauna of the Outer Hebrides, 101
Harz Mountains, Magnetic Survey of the, Dr. Eschenhagen, 182
Hatchery of the Sun-fish, Prof. William L. Stone, 202; Theo. Gill, 319
Haunts of Nature, H. W. S. Worsley-Benison, 173
Hautefeuille (P.), Simultaneous Synthesis of Water and Hydrochloric Acid, 659
Hazen (Prof. H. A.), Anemometer Comparison, 117; Storms and a Central Ascending Current, 383
Head (John), a New Form of Siemens Furnace, 561
Head Growth in Students at the University of Cambridge Francis Galton, F.R.S., 317, 392, 642
Heat, H. G. Madan, 436
Heat-regulation in Man, Prof. Zuntz, 408
Heating, Central Station and Power Supply, W. W. Phipson, 631
Heavens, another Photographic Survey of the, 417
Hebrides, the Outer, a Vertebrate Fauna of the, J. A. Harvie-Brown and T. E. Buckley, 101
Hedges (Killingworth), on Electric Lighting, 630
Helmholtz (Dr. R. von), the Radiating Power of Flame, 240
Helmholtz's Theory of *Timbre*, 479
Hemsley (W. Botting, F.R.S.), the Forest Flora of New Zealand, T. Kirk, 388
Henslow (George), Yew-Trees in Berks, 621
Herdman (Prof. W. A.), Liverpool Marine Biology Committee's Easter Dredging Cruise, 47
Herdman (Prof. W. A.), Unusually Large Hail, 126
Heredity: Sir William Turner, F.R.S., on, 526; Alfred Russel Wallace, 566; Weismann's Essays on, Poulton, Schönland, and Shipley, 618; Examination of Points in Prof. Weismann's Theory of, Dr. S. H. Vines, F.R.S., 621
Herschel, the late Sir John, Reminiscences of, Maria Mitchell, 548
Hersent (H.), the Proposed Channel Bridge, 536, 560
Hertz's Equations, Rev. H. W. Watson, F.R.S., 11
Hertz's (Prof.) Mirrors, Experiments on Radiation with, F. T. Trouton, 585
Hettner (Dr. A.), Observations on Lake Titicaca, 308
Heycock (C. T.) and F. H. Neville, on Raoult's Method applied to Alloys, 587, 628
Heyes (Rev. J. F.), Testing of Colour-Blindness, 572
Hibbert (W.), the Atomic Weight of Zinc, 215
Hibernation of Martins in the Argentine Republic, Tommaso Salvadori, 223
Hillhouse (Prof.), Report of the British Association Committee on the Disappearance of Native Plants from their Local Habitats, 533
Himmel und Erde, 62
Hinman (Russell), Eclectic Physical Geography, 149
Hirudinea, some New Facts about the, 419
History of Ancient Civilization, Rev. J. Verschoyle, 7
Hitchcock (R.), Japanese Lacquer, 655
Hoar-frost, the Structure of, Dr. R. Assmann, 286
Hodeida, Dr. Schweinfurth's Journey to, 182
Hogg (J. W.), on the Volatilization of Lead Oxide and its Action upon Glass at Low Temperatures, 587
Holden (Captain H. C. L., R.A.), Chronograph for Measuring Velocity of Projectiles, 66
Holden (Prof.): White Spot on Saturn's Ring, 15; the Work of an Astronomical Society, 231
Holland, A. L. Rotch on the Meteorological Service in, 383
Holland, Walks in, Percy Lindley, 254
Holmes (W. H.), Ancient Art of the Province of Chiriqui, 436
Holt (Miss C. D.), Hailstorm in Liverpool, 272
Home-reading Circle Union, Proposed National, 133
Homeyer (E. F. von), Death of, 162
Hong Kong Observatory, 351; Education in, Dr. Eitel, 352
Hönnethal, Discovery of Stalactite Cave at, 45
Honolulu, Sunset Glows at, Sereno E. Bishop, 415
Hooker (Sir J. D., F.R.S.), Giphantia, 34
Hopkins (F. G.), Yellow Pigment in Butterflies, 335
Hore (Captain E. C.), on Tanganyika, 629
Hörnes (Dr.), the Burying-Grounds and Civilization of Hallstatt, 286
Hornsey, Discovery of Supposed Fossils at, 14
Horse Power, a Proposed Standard, 515
Horticulture at the Paris Exhibition, 60; Protection of Fruit-trees against Winter Moths, Wilson, 85; the Apple and Pear Conference, 577; Cultivation of Egyptian Date Palm in India, 595
Hospital, Johns Hopkins, Opening of, 107
Howard (Dr. J. L.), the Concentration of Electric Radiation by Lenses, 94
Howard (L. O.), the Fruit Pest *Curculio* in America, 373
Howe (Dr. Jas. Lewis), Classified Cataloguing, 644
Huffert (Dr.), Photographs of Lightning, 190

Huggins (Dr. W., F.R.S.): the Wave-length of Principal Line in Spectrum of Aurora, 68; the Photographic Spectrum of Great Nebula of Orion, 95; Spectrum of the Great Nebula in Orion, 405, 429
Hugo (W.), a Brilliant Meteor, 594
Hull (Prof. E., F.R.S.), on Coral like Structures from the Limestone of Culdaff, 608
Human Physiology, a Text-book of, Dr. Austin Flint, 74
Humour, a Chimpanzee's, Harold Picton, 224
Humpback Whale, Anatomy of the *Megaptera longimana*, John Struthers, 592
Humphreys (Alex. C.), on Water-gas in the United States, 630
Hunter (H. St. J.), Key to Todhunter's Integral Calculus, 593
Huron-Iroquois of Eastern Canada, the, Sir Daniel Wilson, 557
Hutchins (Prof. C. C.), Recent Determinations of the Amount of Lunar Radiations, 209
Huxley (Prof. T. H., F.R.S.), and M. Pasteur on Hydrophobia, 224
Huygens (Christiaan), Œuvres Complètes de, A. M. Clerke, 591
Hydracids, the Action of Light on the, Dr. Richardson, 587
Hydrazine, Methyl, Isolation of, Dr. Gustav von Brüning, 628
Hydrocarbons, Nomenclature of Unsaturated, M. Calderon, 369
Hydrodynamics: on an Electro-magnetic Interpretation of Turbulent Liquid Motion, Prof. Geo. F. Fitzgerald, F.R.S., 32; Treatise on, A. B. Basset, 412
Hydrogen, Chlorine, and Oxygen, on the Explosion of a Mixture of, Prof. H. B. Dixon, 587
Hydrophobia: the Prevention of, 197, 204: Prof. Huxley and M. Pasteur on, 224; the Mansion House Fund for the Pasteur Institute, 537
Hygiene of Japanese Houses, the, Dr. Seymour, 15
Hygiene and Demography, Congress on, at Paris, 252, 326, 350, 372
Hygrometry in the *Meteorological Journal*, Prof. C. Piazzi Smyth, 585
Hyland (J. Shearson), on the Remarkable Form of Hailstones, 544
Hyponitrites, Heat of Formation of, Berthelot, 239
Hysteresis in the Relation of Strain to Stress, Prof. J. A. Ewing, F.R.S., on, 584

Ice Blocks on a Moraine, Prof. T. G. Bonney, F.R.S., 391
Ice, Columnar Structure in, T. D. La Touche, 35; Prof. T. G. Bonney, F.R.S., 55
Ice Growth, Dr. Stefan, 400, 447
Icebergs in North Atlantic, 133
Icebergs, Sir Edwin Arnold upon, 536
Icelandic Naturalist's Society, 516
Iguanas in Philadelphia Zoological Garden, A. E. Brown, 180
Ikosahedron, Lectures on the, Dr. Felix Klein, 35
Imperial Institute, School of Oriental Studies, 251
Implements, Palæolithic, from the Hills near Dunstable, Worthington G. Smith, 151
Implements of Stags' Horns Associated with Whales' Skeletons found in the Carse Lands of Stirling, Sir William Turner, F.R.S., on, 634
Ince (Dr. W. H.), the Formation of Phenylindoles, 166
Incrustations, on the Formation of Marine Boiler, Prof. Vivian B. Lewes, 19
Index to Science, an, J. Taylor Kay, 226; James Blake Bailey, 245
Index of Spectra, W. Marshall Watts, 641
Indexing: Classified Cataloguing, W. M. Flinders Petrie, 392
India: Botany in, J. F. Duthie, 13; the Bhils and their Country, Sir Lepel Griffin, 116; a Practical Guide to the Climates and Weather of India, Ceylon, and Burmah, Henry F. Blanford, F.R.S., 221; Discovery of Old Mining Implements in, Bosworth-Smith, 229; Neolithic Objects Discovered at Ranchi, 230; Sun-spots and Weather in India, 230; Deaths by Snake-bites in, 283; Statistics of Education Department in, 402; Technical Education in Central, 595; the Survey of India, Colonel Thuillier, 444; Atlas of Meteorological Observations in the Indian Ocean, 447; the Early History of India, Mr. Kitts, 480; Importation of Injurious Insects in Indian Wheat, Charles Whitehead, 481; Government Survey Map of, 483; Use of Flowers of *Calligonum polygonoides* as Food in North-West India, J. F. Duthie, 537; Proposed Meteorological Observatory at Verawal, 547; Cultivation of Egyptian Date-Palm in, 595; Geology in, 536; on the Study of Ethnology in, H. H. Risley, 633
Indians, the Canadian, 231
Indies, Dutch East, Prof. Wichmann's Exploration of, 353
Indo-China, Rosset's Exploration of, 599
Industrial Education, Sir Philip Magnus, 245
Industries, Curious, Dr. A. H. Japp's Days with Industrials, 619
"Infernito," 429
Inheritance, on Feasible Experiments on the Possibility of transmitting Acquired Habits by Means of, Francis Galton, F.R.S., 610
Inheritance of Injuries, 327; Dr. August Weismann on, 303; C. Pitfield Mitchell, 391
Inheritance, Natural, Francis Galton on, Hiram M. Stanley, 642
Inorganic Chemistry, Ira Remsen, 339
Insanity, Annual Report of the Commissioners in Lunacy, 253
Insect House at the Zoological Gardens, 105
Insects, Scarce, lately added to the Zoological Gardens, 305
Insects of South Africa, Notes and Descriptions of a Few Injurious Farm and Fruit, Eleanor A. Ormerod, 385
Instinct, Bird-, a Cordial Recognition, W. J. Stillman, 245
Institution of Civil Engineers, 166
Institution of Mechanical Engineers, 207, 261, 595
Instruments, Musical, and their Homes, Mary E. Brown and W. Adams Brown, 436
Integral Calculus, Key to Todhunter's, H. St. J. Hunter, 593
Intermittent Sensations, Thos. Reid, 318
International Chemical Congress, a Correction, 394
International Congress of Celestial Photography, 597
International Medical Congress, the, 576
Internationales Archiv für Ethnographie, 15, 254, 548
Inventions, Chinese, Priority of, 165
Inventions Exhibition in Edinburgh, Proposed, 653
Ireland, Recent Researches into the Origin and Age of the Highlands of Scotland and the West of, Dr. Archibald Geikie, F.R.S., 299, 320
Iridescent Crystals, Lord Rayleigh, F.R.S., 227
Iris, the Minor Planet, Meridian Observations of, 109
Iron Age: Swedish Antiquities from, 163; Discovery in Norway of Objects belonging to, 283
Iron, Chemical Analysis of, Andrew Alexander Blair, 51
Iron Founding, Practical, 390
Iron, the Magnetic Viscosity of, Prof. J. A. Ewing on, 584
Iron, Sir Lowthian Bell, Bart., F.R.S., on the Manufacture of, 473
Iron and Steel Institute, 58, 421, 536, 560, 576
Iron and Steel, International Standards for the Analysis of, John W. Langley, 558
Iron, Temporary Thermo-currents in, F. T. Trouton, 587
Irvine (Robert), and Dr. G. Sims Woodhead, on the Secretion of Carbonate of Lime by Animals, 611
Island, the Floating, in Derwentwater, 290
Italy: Italian Meteorological Society, 85; Seismology in, Prof. Giulio Grablovitz, 246; Dr. H. J. Johnston-Lavis, 294; the Excursion to the Volcanoes of, Dr. H. J. Johnston-Lavis, 294; an Italian's View of English Agricultural Education, Prof. John Wrightson, 428; Forests of North-East Italy, 537; Scientific Excursion to Volcanic Regions of, 537; Ornithology in, Prof. Giglioli, 549; Lake Dwellings in Northern, P. Castelfranco, 562; the Stone Age in, P. Castelfranco, 659

Mechanical Engineers, the Institution of, 261
Mechanical Science, William Anderson's Opening Address in Section G at the British Association, 509; Alex. C. Humphreys, on Water-gas in the United States, 630; Killingworth Hedges, on Electric Lighting, 630; Prof. G. Forbes, F.R.S., on Electric Launches on the Thames, 630; Edward Manville, on Series Electric Traction (Northfleet Tramways), 630; W. H. Preece, F.R.S., on Telegraphic Communication between London and Paris, 631; W. Webster, on the Purification of Sewage by Electrolysis, 631; Prof. W. C. Unwin, F.R.S., on the Strength of Alloys at Different Temperatures, 631; W. W. Phipson, on Central Station Heating and Power Supply, 631; Alex. P. Trotter, on a Curve Ranger, 631; W. H. Wheeler, on the Transporting Power of Water in the Deepening of Rivers, 631
Mechanics, Applied, Dr. A. Low, 31
Mechanics, an Elementary Treatise on, Rev. J. Warren, 365
Medical Congress, the International, 576
Medicine, the Advancement of, 411
Megaptera longimana, the Anatomy of the Humpback Whale, John Struthers, 592
Meldola (Prof. R., F.R.S.): Isomerism of Alkyl-derivatives of Mixed Diazoamido-compounds, 215; Monobenzyl-derivatives of Phenylenediamines, 335
Mémoires de la Société d'Anthropologie de Paris, 142
Memorial, the Henry Draper, 17
Memphis, U.S.A., Earthquakes at, 305
Mendeleeff (Dmitri Ivanovitch): Scientific Worthies, Prof. T. E. Thorpe, F.R.S., 193; an Attempt to Apply to Chemistry one of the Principles of Newton's Natural Philosophy, 354
Mental Faculties of *Anthropopithecus calvus*, Prof. Geo. J. Romanes, F.R.S., 160
Mercantile Marine, Colour-Blindness and Defective Far-Sight among the Seamen of the, 438
Mercury, Residuals of, O. T. Sherman, 63
Meridian Observations of the Minor Planet Iris, 109
Meristems of Ferns as a Study in Phylogeny, Prof. F. O. Bower, 610
Metallurgy: Uranium, 462; Sir Lowthian Bell, Bart., F.R.S. on the Manufacture of Iron, 473; a New Form of Siemens Furnace, Head and Pouff, 561; the Thomson Electric Welding Process, W. C. Fish, 561
Meteorology: Rain Clouds on Lake Titicaca, Hon. Ralph Abercromby, 12; Meteorological Report (1883-84) for New Zealand, 14; Temperature and Sunshine Notes for 1889, 14; Contributions to Meteorology, Elias Loomis, 21; Movement of Cyclonic Storms in Various Regions, H. Faye, 23; Synoptic Table of Weather Prediction, Plumandon and Colomès, 61; Rain Clouds, Dr. Julius Hann, 78; San José Meteorological Institute, 84; Experiments on the Connection between Wind Pressure and Velocity, W. H. Dines, 94; Upper Wind Currents over the Equator in the Atlantic Ocean, Hon. Ralph Abercromby, 101; Bibliography of Meteorology, 107; Pilot Charts of North Atlantic Ocean, 107; Pilot Chart of North Atlantic, 305, 401, 578, 595; the Meteorological Services in Europe, A. L. Rotch, 117; the Formation of Atmospheric Precipitates, Dr. Vettin, 119; the Meteorological Society, 119; Synoptic Weather Maps Published by St. Petersburg Observatory, 133; Meteorological Observatory, Rousdon, 163; Die Meteorologie ihrem Neuesten Standpunkte gemäss und mit besonderer Berücksichtigung geographischer Fragen dargestellt, Dr. Siegmund Günther, 173; Meteorology of North Atlantic for May, 179; Exceptional Development of some Tropical Cyclones, 191; Long-time Weather Predictions in America, 208; a Practical Guide to the Climates and Weather of India, Ceylon, and Burmah, Henry F. Blanford, 221; Sunspots and Weather in India, 230; Meteorology of Mauritius, 230; the Recent Thunderstorms, W. Marriott, 238; Intense Heat in Russia, 253; Sudden Depression of the Deutsche Seewarte Barometer, 253; Bulletin of the Sikawei Meteorological Observatory, 253; the Eiffel Tower as a Lightning Conductor, 261; the American Meteorological Journal, 262, 383; Meteorologische Zeitschrift, 262, 482, 611; Velocity of Propagation of Thunderstorms in South Germany, Dr. Lang, 283; Blue Hill Meteorological Observatory, 283; Sand-showers, Prof. P. F. Denza, 286; Winters of South Crimean Coast, 286; the Cold Period of May, Dr. B. Andries, 286; Meteorology of the North Atlantic, 305; the Meteorological Service in Belgium, A. L. Rotch, 311; Meteorology in Scotland, 326; Dust-fogs off the Cape de Verd Islands, 327; Discussion of Instructions for Observers of Prussian Meteorological Institute, Dr. Wagner, 334; Ben Nevis Observatory, 350, 351; Report of Hong Kong Observatory, 351; Meteorological Committee Meeting at Zurich, International, 373; Storms and a Central Ascending Current, Prof. H. A. Hazen, 383; Prof. H. A. Hazen on Storms, 383; A. L. Rotch on the Meteorological Service in Holland, 383; Prof. C. F. Marvin on Anemometer Experiments, 383; the Meteorological Service in Holland, A. L. Rotch, 383; Meteorology of the Cape of Good Hope for 1888, 401; Paris Central Meteorological Office, M. Anger, 421; Biological Considerations upon Cyclones and Anticyclones, Dr. W. Köppen, 422; British Rainfall, 1888, G. J. Symons, F.R.S., 437; St. Elmo's Fire on Ben Nevis, 439; Decrease of Temperature with Increase of Altitude, Prof. W. Ferrel, 445; Diurnal and Annual Oscillations of Barometer, H. H. Clayton, 445; Atlas of Observations in Indian Ocean, 447; Storms, and Geyser Outbreak in United States, 516; Proposed Meteorological Observatory at Perim, 516; Report of the Committee appointed by the British Association for the purpose of co-operating with the Scottish Meteorological Society in making Observations on Ben Nevis, 535; Cyclone of Jougne (July 13, 1889), C. Dufour, 540; Noctilucous Clouds, Prof. John Le Conte, 544; Proposed Meteorological Observatory at Verawal, in India, 547; Meteorology in Greenland, 578; on the Determination of the Amount of Rainfall, Prof. Cleveland Abbe, 585; Hygrometry in the *Meteorological Journal*, Prof. C. Piazzi Smyth, 585; Prof. C. Michie Smith on Atmospheric Electricity, 585; Shining Night Clouds, an Appeal for Observations, 594; Meteorology in New England, 595; Determination of Height of Aurora, 654; Proposed Meteorological Observations at Tiberias, Palestine, Dr. Torrance, 654; Meteorological Experiences on the Sentis, Dr. Assmann, 660
Meteors: April, 15; Meteor Showers, 16, 46, 86, 109, 136, 165, 181, 231, 256, 285, 308, 329, 352, 375, 403, 424, 448, 483, 516, 539, 551, 578, 598, 629, 656; Brilliant Meteor, Capt. T. Herbert Clarke, 35; Remarkable Meteors, W. F. Denning, 150; Meteor, F. T. Mott, 174; Meteoric Waters, the Toxic Properties of, Dr. Freire, 168; Brilliant Meteor in Ljungby, 179; Meteor at Copenhagen, 229; a Remarkable Meteor, Richard Clark, 573; Fine Slow-moving Meteor, W. F. Denning, 594; a Brilliant Meteor, W. Hugo, 594; Meteorites, Notes on, J. Norman Lockyer, F.R.S., 136; Meteorites found at Scania, 229; Mr. Gregory's Collection of Meteorites, 654; Meteoritic Theory, Prof. Cleveland Abbe, 53
Methyl Ethylamine, Drs. Skraup and Wiegmann on, 14
Methyl Hydrazine, Isolation of, Dr. Gustav von Brüning, 628
Metric System of Weights and Measures, Extension of the, De Malarce, 164
Mexican Monuments and Historical Remains, Governmental Measures for Study and Preservation of, 283
Meyer (Dr. A. B.), *Astrarchia stephanie*, 461
Meyer (Dr. H.), the Snow-fall on the Summit of Kilimanjaro, 46
Michaelis (Dr.), New Aromatic Compounds of Bismuth, 134
Micro-biology: Transformism in, A. Chauveau, 612; Pathogenic, Transformism in, A. Chauveau, 636
Micro-organisms, Psychic Life of, Alfred Binet, 541
Microbes and Infection, 384
Microbes of Chicken-Cholera, Experiments with, Dr. O. Katz, 401
Microscopic Vision, the Closed Eye in, M. Landerer, 282
Microscopical Mineralogy, Prof. H. Rosenbusch, Prof. John W. Judd, F.R.S., 313
Microscopy: *Amphioxus lanceolatus*, Prof. E. Ray Lankester, F.R.S., 116; Maturation of Ovum in Cape and New Zealand

Peripatus, Lilian Sheldon, 116; *Cidaris papillata*, Prof. M. Duncan, 237
Middens, the Jutland, Captain Madsen, 108
Middle Lias of Northamptonshire, Beeby Thompson, 341
Midland Union of Natural History Societies, 372, 549
Migration of Birds, Report to the British Association on the Observations made at Lighthouses and Light-vessels, John Cordeaux, 556
Milk, Quantitative Analysis of Bicarbonate of Soda in, L. Padé, 336
Mill (Dr. Hugh Robert): Report to the British Association on the Seasonal Variations in the Temperature in Lakes, Rivers, and Estuaries of the United Kingdom, 556; on the Physical Basis of Commercial Geography, 629
Miller-Hauenfels (Albert R. von), Richtigstellung der in bisheriger Fassung unrichtigen Mechanischen Wärmetheorie und Grundzüge einer Allgemeinen Theorie der Aetherbewegungen, 244
Millosevich (Prof.) Comet 1889 *b* (Barnard, March 31), 255
Milne (Prof. John): Ninth Report on the Earthquake and Volcanic Phenomena of Japan, 608; Seismological Work in Japan, 656
Minchin (Prof.), the Vices of our Scientific Education, 126
Mineralogy: the Mineralogical Magazine, 230; Cours de Minéralogie, A. de Lapparent, 460; Petrographical Tables of Rock-forming Minerals, an Aid to the Microscopic Determination of, Prof. H. Rosenbusch, Prof. John W. Judd, F.R.S., 313
Mining Appliances, Improvements in, Ralph Moore, 61
Mining Implements, Old, in India, Bosworth-Smith, 229
Minor Planet, New, 135, 424; Prof. Peters, 448
Minot and Allis on the Mammalian Placenta and the Lateral Line System in Amia respectively, 419
Missions, French Government Scientific, 479
Mitchell Library, Glasgow, 62
Mitchell (C. Pitfield), Inheritance of Injuries, 391
Mitchell (Maria): Death of, 253; Reminiscences of the late Sir John Herschel, 548
Mitchell (Prof. O. H.), Death of, 208
Mites, F. T. Mott, 572
Mites in South African Entomological Collections, 283
Mithradatism, Prof. E. Ray Lankester, F.R.S., 149
Mivart (Dr. St. George), Anapophyses, 394
Mixter (William G.), an Elementary Text-book of Chemistry, 389
Mohn (Dr.), the Barents Sea, 598
Molecules, Atoms and, the Organization of, Prof. A. E. Dolbear, 419
Monaco Exhibit at the Paris Exhibition, 61
Monaco (Prince Albert of), Surface Currents of North Atlantic, 167
Mond (Ludwig), New Dry Gas Battery, 211
Mondy (E. F.), Electrolysis of Potassium Iodide, 417
Monetary Standards, Report to the British Association on the Variations in the Value of, Prof. F. Y. Edgeworth, 553
Moniez (M.), Metamorphosis and Migration of a Free Nematode, 563
Monument to late Mr. Dalgleish, Erection of, 595
Moon, Halo of the, and Formation of Peculiarly-shaped Clouds at Oxford, Otto V. Darbishire, 55
Moore (Ralph), Improvements in Mining Appliances, 61
Moore (Capt. W. U.), the Bore of the Tsien-Tang Kiang, 163
Moore (W. Usborne), Coral Reefs, 203, 271
Moraine, Ice-Blocks on a, Prof. T. G. Bonney, F.R.S., 391
Moral Order and Progress, an Analysis of Ethical Conceptions, S. Alexander, 169
Moravia, the Great Mammoth Deposit in, Prof. Steenstrup, 229
Morley Memorial College for Working Men and Women, 653
Morocco, H. M. P. de la Martinière, 202
Morphology: Some New Facts about the Hirudinea, 419; the Organization of Atoms and Molecules, Prof. A. E. Dolbear, 419; Minot and Allis on the Mammalian Placenta and the Lateral Line in Amia respectively, 419; the Journal of Morphology, a Record of Progress, 419; Prof. Burdon-Sanderson, F.R.S., on Morphology, 521
Morris (D.): *Sideroxylon dulcificum*, 238; Report to the British Association on the Zoology and Botany of the West India Islands, 553
Morris (Dr. G. H.): Amylo-dextrin, 214; Determination of Molecular Weights of Carbohydrates, 214
Morse and White, an Extreme Case of "Mass" or Catalytic Action, 328
Motion, our Sensations of, Prof. A. Crum Brown, 449
Mott (F. T.): Meteor, 174; on Mites, 572
Mountain of the Bell, a New, H. Carrington Bolton, 35
Mounting Dried Plants, Method of, Dr. John Wilson, 438
Mühlenfels (Captain R. von), Experiments on Storing Fish, 402
Munro (Charles), on the Explosiveness of the Celluloids, 558
Müntz (A.): the Formation of Nitrogenous Earths, 48; Proportion of Nitrates in Tropical Rains, 119
Murray (Geo.) and Alfred W. Bennett, a Hand-book of Cryptogamic Botany, 217
Murray (Dr. John): Coral Reefs, 222, 294; the Three Cruises of the *Blake*, Alexander Agassiz, 361
Muscle, Experiments on Mechanical Latent Period of, Dr. Cowl, 408
Muscles, Influence of Temperature upon Working Power of, Prof. Gad, 288
Muscular Sense, the, Dr. Goldschneider, 119
Museum, National Science, 3
Museum, Paris Natural History, 326
Museums, Prof. W. H. Flower, C.B., F.R.S., on, 463
Music, Important Discovery in the Theory of, Rudolph Koenig, 479
Musical Instruments and their Homes, Mary E. Brown and W. Adams Brown, 436
Mussel-poisoning, French Report on, 178
Muybridge Photographs, Prof. E. Ray Lankester, F.R.S., 78, 126
Mysore, Capture by Superintendent Sanderson of Herd of 100 Wild Elephants in, 282
Mysticism, Philosophy of, Carl du Prel, 28
Mytilene, Earthquake at, 653

Nadaroff (Colonel), the South Usuri Region, 165
Name for Unit of Self-Induction, Prof. Oliver J. Lodge, F.R.S., 11
Nansen (Dr. Fridtjof): Return of, 84; his Journey across Greenland, 103, 210, 479; on the Geology of Greenland, 608; on the Esquimaux, 633
Naphtha as Fuel in Middle Russia, 163
Naphthalene, Nomenclature of, 370
Natal Observatory, 655
Nathorst (Dr. A. G.), on the Geological History of the Prehistoric Flora of Sweden, 453
National Home-Reading Union, 421
National Science Museum, 3
Natural History: Bird Life of the Borders, Abel Chapman, 147
Natural History of the Friendly Islands and other Islands in the Pacific, Report to the British Association on, 556
Natural History Gardens in Boston, Proposed, 577
Natural History Museum: South Kensington, 13; Paris, 326
Natural Inheritance, Francis Galton on, Hiram M. Stanley, 642
Natural Philosophy, an Attempt to Apply to Chemistry one of the Principles of Newton's, Prof. D. Mendeleeff, 354
Natural Science, a Graduated Course of, Benjamin Loewy, 271
Nature, Haunts of, H. W. S. Worsley-Benison, 173
Nebulæ, Cometic, Prof. A. W. Rücker, F.R.S., on, 583
Nematode, Metamorphosis and Migration of a Free, Moniez, 563
Neolithic Objects discovered at Ranchi, 230
Netto's (Dr.) Process for the Manufacture of Aluminium from Cryolite, Prof. Bedson, 587
Neville (F. H.) and C. T. Heycock on Raoult's Method applied to Alloys, 587
Neville and Heycock on Alloys, 628
New Code and Science Teaching, the, Dr. J. H. Gladstone, F.R.S., 1
New England, Meteorology in, 595
New Guinea: Ascent of Summits of Owen Stanley Range by Dr. Macgregor, 308, 449, 551; Signor Lorie's Scientific Investigations in, 445
New South Wales: Proposed Exploration of Interior of, 182; Records of the Geological Survey of, 254; Royal Society of, 263
New Zealand: Meteorological Report for, 14; Volcanic Activity in, Mount Ruapehu, 179; the Forest Flora of, T. Kirk, W. Botting Hemsley, F.R.S., 388

Newall (Robert Stirling, F.R.S.), Death of, 13; Obituary Notice of, 59
Newall Telescope Syndicate, Preliminary Report of the, 114
Newcastle and District, Hand-book of, 479
Newcastle-on-Tyne, Meeting of the British Association at, 349
Newsholme (A.), Elements of Vital Statistics, 145
Newton's Natural Philosophy, an Attempt to apply to Chemistry one of the Principles of, Prof. D. Mendeleeff, 354
Nicaise (M.), Physiology of the Trachea, 612
Nichols (E. L.), Spectro-Photometric Comparison of Sources of Artificial Illumination, 404
Nicholson (Sir Arthur), Primary Technical Education in Hungary, 164
Nickel and Steel, Alloys of, James Riley, 58
Night-Clouds, Luminous, D. J. Rowan, 151
Night-Clouds, Shining, an Appeal for Observations, T. W. Backhouse, 594
Nilson (Prof.), the Vapour-Density of Aluminium Chloride, 596
Nitrate of Soda and the Nitrate Country, Hon. Ralph Abercromby, 186, 308
Nitric Acid Vapour, Experiments on Combustion in, Dr. P. T. Austen, 45
Nitrogen Compounds, the Magnetic Rotation of, Dr. W. H. Perkin, F.R.S., 166
Nitrogen, the Fixation of Atmospheric, M. Berthelot, 539
Nitrogen, the Formation of Earths containing, Müntz and Marcano, 48
Nitrogen, Influence of Gypsum and Clay on Fixation, &c., of, Péchard, 539
Nitrogen, Ring Formulæ containing, 370
Nitrogen in Soils, Loss and Gain in, P. P. Dehérain, 48
Nitrogen in Vegetation, Sources of, 332; W. Mattieu Williams, 394
Nitroso-Camphor, the Oxidizing Action of, under the Influence of Light, 384
Noctilucous Clouds, Prof. John Le Conte, 544
Nodon (Albert), Electric Phenomena Produced by Solar Radiation, 384
Nomenclature of Unsaturated Hydrocarbons, M. Calderon, 369
Norman (Rev. A. M.) and Dr. G. S. Brady, Monograph of the Marine and Fresh-water Ostracoda of the North Atlantic and of North-Western Europe, 364
Northamptonshire, the Middle Lias of, Beeby Thompson, 341
Northfleet Series Electric Tramway, 39
Northumberland in Prehistoric Times, Rev. G. Rome Hall on, 633
Norway: Earthquake in, 133; the Norwegian Cod Fishery, 229; Avalanche on Jösen Fjord, 229; Discovery of Iron Age Objects in, 283; Colour of Eyes and Hair in, Abbo and Faye, 285; on the Crystalline Schists of, Dr. A. Geikie, F.R.S., 608
Nose-blackening as a Preventive of Snow-Blindness, Rev. Henry Bernard, 438
Nova Zembla, Dr. J. Kinunen's Exploration of, 254
Nuclein, Prof. Kossel, 119
Number Seven, some Properties of the, R. Tucker, 115
Nuovo Giornale Botanico Italiano, 92, 334

Oak Leaf, on the Shape of the, and the Leaves of the Guelder Rose, Sir John Lubbock, F.R.S., 611
Obermüller (Dr.), a New Reaction for Cholesterin, 288
Observatories: the Proposed Vatican Astronomical Observatory, 84; the Annual Visitation of the Greenwich Observatory, 139; Stonyhurst College Observatory, 164; Oxford University Observatory, 205; Mauritius Observatory, 230; Vienna Observatory, 329; Hong Kong Observatory, 351; Jubilee Observatory at Pulkowa, 401; Publications of the Potsdam Observatory, 482; Yale College Observatory, 448; Algiers Observatory, 539; Mr. Tebbutt's Observatory, Windsor, New South Wales, 550; Astronomical Observatories, Geo. H. Boehmer, 597; Natal Observatory, 655; Rousdon Meteorological Observatory, 163; Blue Hill Meteorological Observatory, 283; Ben Nevis Observatory, 350, 351; Proposed Meteorological Observatory at Perim, 516
Ocean Currents, the Chemistry of, Dr. John Gibson, 84
Oklahoma, 16
Ol, the Use of the Suffix, 370
Olenellus Fauna in North America and Europe, the, C. D. Walcott, 310
Oligochæta, Fresh-water, F. E. Beddard, 611
Omo, the River, Outflow of the, Giulio Borelli, 165, 353
Omond (R. T.), Atmospheric Electricity, 102
Openchowski (Dr.), the Movement and Innervation of the Stomach, 240
Oppenheim (Dr. H.), Comet 1889 *d* (Brooks), 328
Optics: a Refraction Goniometer, A. P. Trotter, 71; Intermittent Vision, Couetoux, 86; the Magnetic Rotation of Plane of Polarization of Light in Doubly-Refracting Bodies, A. W. Ward, 117; Geometrical Optics, Prof. S. P. Thompson, 150; the Use of the Biquartz, A. W. Ward, 191; Optical Torque, Prof. Silvanus P. Thompson, 232, 257; the Closed Eye in Microscopic Vision, M. Landerer, 282; Indirect Vision, Kirschmann, 373; Mechanism of Photodermatic and Photogenic Functions in Siphon of *Pholas dactylus*, Raphael Dubois, 384; Analysis of the Light diffused by the Sky, Crova, 563; on the Relation between Brachistochrones and Ray-Paths, Prof. Everett, F.R.S., 584
Orchids, Prof. H. G. Reichenbach's Collection of, 253
Organic Analysis, Commercial, Alfred H. Allen, Dr. C. R. Alder Wright, F.R.S., 289
Oriental Congress, the International, 536
Oriental Races, on the Natural Colour of Skin in certain, Dr. J. Beddoe, F.R.S., 633
Oriental Studies, a New School of, 251
Origin and Age of the Highlands of Scotland and the West of Ireland, Recent Researches into the, Dr. Archibald Geikie, F.R.S., 299, 320
Orion, Spectrum of Great Nebula in, William Huggins, F.R.S., and Mrs. Huggins, 405, 429
Ormerod (Eleanor A.), Notes and Descriptions of a Few Injurious Farm and Fruit Insects of South Africa, 385
Ornithology: Sailing Flight of the Albatross, R. E. Froude, 102; Sailing Flight of Large Birds over Land, 518; Dr. R. Courtenay, 573; Does the Cuckoo ever Hatch its own Eggs?, 133; Appearance of *Pastor roseus* in Bulgaria, 179; a Cordial Recognition, W. J. Stillman, 245; the Preservation of the Eider in Sweden, 254; *Prionodura newtoniana* and *Acanthiza squamata*, De Vis, 327; Ornithology in Italy, Prof. Giglioli, 549; Report to the British Association on the Observations made at Lighthouses and Light-vessels on the Migration of Birds, John Cordeaux, 556; Ornithological Observatories in Saxony 577
Oshima, the Volcanic Island of, 179
Ostheimer (G. R.), Tainter's Graphophone, 167
Ostracoda, Monograph of the Marine and Fresh-water, of the North Atlantic and of North-Western Europe, Dr. G. S. Brady and Rev. A. M. Norman, 364
Otto (Dr.), Pinol, an Isomer of Camphor, 655
Owens College, Manchester, 207
Oxalomolybdic Acid Discovered by M. Péchard, 107
Oxford, Halo of the Moon and Formation of Peculiarly-shaped Clouds at, Otto V. Darbishire, 55
Oxford and its Professors, 637
Oxford, University Extension, Programme of Second Summer Meeting, 281
Oxford University Observatory, 205
Oxygen Lines in the Solar Spectrum, on the Telluric Origin of, J. Janssen, 104
Oyster Culture, Swedish, 229
Ozone Paper, Improved Method of Preparing, Dr. C. H. Blackley, 94

Pacific, Astronomical Society of the, 231
Pacific, Eastern, British Annexation of Humphrey and Rierson Islands, 483
Padé (L.), Quantitative Analysis of Bicarbonate of Soda in Milk, 336
Palæolithic Age in Italy, the, P. Castelfranco, 659
Palæolithic Implements from the Hills near Dunstable, Worthington G. Smith, 151
Palæolithic Man in America, W. J. McGee, 163
Palæontology: Discovery of Supposed Fossils at Hornsey, 14; Discovery of Antediluvian Fossil Mammals at Ixelles, Michel Mourlon, 21; Palæontology of Sturgeons, A. Smith Woodward, 186; Chelonian Remains from Wealden and Purbeck, R. Lydekker, 238; Mastodons found at Tournan, 239; Système Silurien du Centre de la Bohême, Joachim Barrande, 267; the Fossil Human Bones at Gourdon, Dr. Hamy, 285;

Structural Peculiarities of Colymbosaurus, Prof. H. G. Seeley, F.R.S., 653
Palermo, the Circolo Matematico of, 316
Palestine, Meteorology of, Proposed Observations at Tiberias, Dr. Torrance, 654
Panmixia, Prof. Weismann's Use of the Word, 610
Paper-making, a Text-book of, C. F. Cross and E. J. Bevan, 414
Paris: Academy of Sciences, 23, 48, 71, 95, 118, 144, 167, 191, 215, 239, 263, 287, 311, 336, 383, 407, 432, 456, 484, 539, 563, 588, 612, 636, 659; Paris Exhibition, Opening of, 44; Horticulture at the Exhibition, 60; Monaco Exhibit at the Exhibition, 61; the Lifts in the Eiffel Tower, 261; the Terrestrial Globe at the Paris Exhibition, 278; Congress on Celestial Photography, 252; Congress of the Botanical Society of France, 252; Zoological Congress in, 252; Congress on Hygiene and Demography at, 252, 372; International Agricultural Congress at, 252; Congress of Physiological Psychology, 304; Paris Natural History Museum, 326; the Fêtes in Connection with Opening of Sorbonne, 372; the Meeting of the Iron and Steel Institute at, 421; Central Meteorological Office, M. Anger, 421; W. H. Preece, F.R.S., on Telephonic Communication between London and Paris, 631
Pasteur (M.) and Prof. Huxley, on Hydrophobia, 224
Pasteur (M.), Sir Henry Roscoe, F.R.S., and, 578
Pasteur Institute: Mansion House Fund for, 177, 537; at Rio Janeiro, 208; Letter from M. Pasteur, 278; at Rome, Proposed, 326
Pas'or roseus in Bulgaria, Appearance of, 179
Patches of Prismatic Light, C. S. Scott, 224
Pathology, Text-book of, Prof. D. J. Hamilton, 270
Peal (S. E.), Sailing Flight of Large Birds over Land, 518
Pearl Fishery, Tuticorin, Edgar Thurston, 174
Péchard (M.): Oxalomolybdic Acid Discovered by, 107; Influence of Gypsum and Clay on Fixation, &c., of Nitrogen, 539
Pekelharing (M.), Destruction of Anthrax Virus in Subcutaneous Tissues of Rabbits, 312
Pembrey (M. S.), the Accurate Determination of Carbonic Acid and Moisture in Air, 70
Pepper-feeding on Birds, Effects of, Dr. Sauermann, 192
Peracca (M. G.), the Private Laboratory of Marine Zoology at Rapallo, 302
Percy (Dr. John, F.R.S.), Obituary Notice of, Prof. W. C. Roberts-Austen, F.R.S., 206
Perim, Proposed Meteorological Observatory at, 516
Periodical Press Index, 107
Perkin (Dr. W. H., F.R.S.): the Magnetic Rotation of Nitrogen Compounds, 166; Melting-points of Salicylic and Anisic Compounds, 335; Action of Propionyl and Butyryl Chloride on Phenol, 335

Petit, Heats of Combustion of Carbons, 167
Petrie (W. M. Flinders): Ancient Egyptian Funeral Wreaths, 211; Classified Cataloguing, 392; on Wind Action in Egypt, 629
Petrographical Tables, an Aid to the Microscopical Determination of Rock-forming Minerals, Prof. H. Rosenbusch, Prof. John W. Judd, F.R.S., 313
Petroleum, William Anderson on, 512
Pettersson (Prof.), the Vapour-Density of Aluminium Chloride, 595
Pharmaceutical Conference at Durham, 479
Pharmacy in Bulgaria, 306
Phenacodus and the Athecæ, Lydekker on, Prof. E. D. Cope, 298
Phenacodus, Skeleton of, 57
Phenomena, Sudden, the Observation of, S. P. Langley, 404
Phenylindoles, the Formation of, Dr. W. H. Ince, 166
Philadelphia, Centenary of American Philosophical Society at, 576
Philology, the Avarian Language, Baron Uslar, 283
Philosophy of Mysticism, Carl du Prel, 28
Phipson (W. W.), on Central Station Heating and Power Supply, 631
Phisalix (C.), Experiments on Poison of Terrestrial Salamander, 484
Phonautograph, Researches on French Accent with, Dr. Pringsheim, 168
Phormium tenax as a Fibrous Plant, 390
Phoronis, a New Species of, 384
Phosphonium, on the Existence of Sulphate of, A. Besson, 659
Photography: Photographic Determination of the Brightness of the Stars, 15; Photographic Study of the Stellar Spectra Conducted at the Harvard College Observatory, 17; Geological Photography, Osmund W. Jeffs, 34; Mr. J. Gale's Photographs at Camera Club, 44; Chromatic Photography by Use of Coloured Glasses, G. Lippmann, 48; the Dark Flash in Lightning Photographs, G. M. Whipple, 70; Muybridge Photographs, Prof. E. Ray Lankester, F.R.S., 78, 126; Dictionary of Photography, E. J. Wall, 101; Photography of Lightning, Dr. Hoffert, 190; Traité Encyclopédique de Photographie, Charles Fabre, 244; Les Levers Photographiques et la Photographie en Voyage, Dr. Gustave Le Bon, 245; the International Annual of Anthony's Photographic Bulletin, 245; Photographic Society of Japan, 327; Photographic Star gauging, A. M Clerke, 344; Photographic Convention of the United Kingdom, 401; Another Photographic Survey of the Heavens, 417; Reduction of Rutherfurd's Photographs of the Pleiades and Præsepe, 448; Telescopes for Stellar Photography, Sir Howard Grubb, F.R.S., 441, 645; Captain Abney, C.B., F.R.S., on Photography, 469; Use of the Carrier Pigeon in Photography, 537; on the Quantity of Deposit of Silver produced by the Development on a Photographic Plate in Terms of the Intensity of Light acting, Captain W. de W. Abney, F.R.S., 584; Lord Rayleigh on Pin-hole Photography, 584; the Photographic Quarterly, 595; Astro-photographic Conference, 597; International Congress of Celestial Photography, 597; Prof. Liveing on Eikonogen, a New Developer, 587
Photometer, Bunsen's, D. M. Lewis, 174
Photometry, Practical, a Guide to the Study of the Measurement of Light, W. J. Dibdin, 572
Photometry, Spectro-Photometric Comparison of Sources of Artificial Illumination, Nichols and Franklin, 404
Phylogeny, on the Meristems of Ferns as a Study in, Prof. F. O. Bower, 610
Physical Geography: the Secular Rising of the Baltic Coasts, 108; Mean Altitude of Continents and Mean Depth of Oceans, A. de Tillo, 239
Physical Laboratory fitted up at Fettes College, Edinburgh, 627
Physical Science, Suggestions for a Course of Elementary Instruction in, Prof. H. E. Armstrong, F.R.S., 600
Physical Science, Teaching of, in Public Schools, 589
Physical Society, 70, 93, 143, 190, 262
Physical Society, Proposed Liverpool, 627
Physical Terms, Japanese Vocabulary of, 306
Physics: the Science and Art Examination in, 102; Prof. von "Crank," 244; Magnetic Leakage in Dynamos, H. S. Carhart, 559; Improved Clark Standard Cell with Low Temperature Coefficients, H. S. Carhart, 559; Mercurial Thermometers, Rogers and Woodward, 559
Physiology: Influence of Digestive Juices in Virus of Tetanus, Prof. G. Sormani, 21; the Ferment Action of Bacteria, Drs. Lauder Brunton and Macfadyen, 21; a Text-book of Human Physiology, Dr. Austin Flint, 74; Nuclein, Prof. Kossel, 119; Formation of Horny Layer of Skin, Dr. Blaschko, 119; the Muscular Sense, Dr. Goldscheider, 119; Apparatus for Examining the Bladder, Dr. Nitze, 192; the Movement and Innervation of the Stomach, Dr. Openchowski, 240; Physiological Society, 240; Proposed Chair of Physiology at University College, Dundee, 252; Influence of Temperature upon Working Power of Muscles, Prof. Gad, 288; Destruction of Anthrax Virus in Subcutaneous Tissues of Rabbits,

M. Pekelharing, 312; Physiological Diagrams, G. Davies, 317; Heat-Regulation in Man, Prof. Zuntz, 408; Darwinism, Alfred Russel Wallace, Prof. E. Ray Lankester, F.R.S., 566; the Senses of Criminals, 596; Physiology of the Trachea, M. Nicaise, 612; Penetration of Spermatozoids into Egg of Frog, M. Massart, 635
Pickering (S. U.): Heat of Neutralization of Sulphuric Acid, 94; the Expansion of Liquids, 166; the Nature of Solutions, 166; Use or Abuse of Empirical Formulæ and of Differentiation by Chemists, 343; on Some Effects of Lightning, 415
Picton (Harold), a Chimpanzee's Humour, 224
Pidgeon (Daniel), Atmospheric Electricity, 77
Pigeon, Carrier, in Photography, Use of, 537
Pilot Charts of North Atlantic Ocean, 107, 305, 401, 578, 595
Pin-hole Photography, Lord Rayleigh, F.R.S., on, 584
Pinol, Drs. Wallach and Otto, 655
Pisciculture: Artificial Fertilization of Ova, Thomas Scott, 163; Acclimatization of Salmon, 282; Lake Trout Reared at Champ de l'Air, Prof. Blanc, 422; the Natural Oyster Banks of Brittany, Bouchon-Brandely, 481
Pitkin (James) and Niblett's Fire-damp Meter, 66
Placenta, Mammalian, Minot and Allis on, 419
Placentation of the Dugong, Sir W. Turner, F.R.S., 611
Planets: New Minor Planets, 135, 424; Prof. Peters, 448; the Minor Planet Victoria, 109; the Planet Uranus, R. A. Gregory, 235
Plants, the Uses of, G. S. Boulger, 292
Plants, Dried, a Method of Mounting, Dr. John Wilson, 438
Plants, Report of the British Association Committee on the Disappearance of Native Plants from their Local Habitats, 533
Platanus Genus, the Origin of the, 61
Playfair (Consul-General), the Dangers of Viticulture in Algeria, 423
Playfair (Right Hon. Sir Lyon, F.R.S.): on Universities, 204; Subjects of Social Welfare, 637; Bimetallism, 638; Displacement of Labour by Modern Inventions, 638; Technical Education, 639
Pleiades and Præsepe, Reduction of Rutherfurd's Photographs of the, 448
Pleistocene Papers, 609
Plumandon and Colomès, Synoptic Table of Weather Prediction, 61
Poison in Cured Fish, Prize offered by Russian Academy of Sciences for Inquiring into, 178
Poison of Terrestrial Salamander, Experiments on, C. Phisalix, 484
Polarization, Elliptical, by Reflection, A. Cornu, 71
Polarization, Recent Researches on, Electro-magnetic Rotatory, Prof. Kundt, 96
Polarized Light, Notes on, Prof. S. P. Thompson, 143
Political Economy: Mathematical Method in, Rudolf Auspitz and Richard Lieben, 242; Mathematical Theory of, Léon Walras, 434; Prof. F. Y. Edgeworth's Address in Section F at the British Association, 496
Pontedera azurea, W. C. Sowerby, 327
Porpoises, the Protection of Fishermen against, Prof. E. Perrier, 402
Portugal, Botany in, 253
Posewitz (Dr. Theodor), Borneo, 49
Potassium Iodide, Electrolysis of, E. F. Mondy, 417
Potsdam Observatory, Publications of the, 482
Pouchet (Georges), the Oceanic Sardine, 384; Currents of North Atlantic, 577
Pouff (P.), a New Form of Siemens Furnace, 561
Poulton (E. B., F.R.S.): on the Supposed Transmission of Acquired Characters, 610; Weismann's Essays on Heredity, &c., 618; the Yellow Powder from Cocoon of *Clisiocampa neustria* under Microscope, 635; Change of Colour in Living Larvæ of *Hemerophila abruptaria*, 635
Preece (William Henry, F.R.S.): and Julius Maier, the Telephone, Prof. A. Gray, 200; on the Relative Effects of Steady and Alternate Currents on Different Conductors, 586; and Prof. G. Forbes, F.R.S., on a New Thermometric Scale, 587; on Telephonic Communication between London and Paris, 631
Prefixes bi- and di-, the Use of the, 370
Prehistoric Flora of Sweden, on the Geological History of the, Dr. A. G. Nathorst, 453
Prehistoric Times in Northumberland, Rev. G. Rome Hall on, 633

Snake-bites, Death in India by, 283
Snow, the Influence of, on the Soil and Atmosphere, A. Woeikof, 314
Snow-blindness, Nose-blackening as a Preventive of, Rev. Henry Bernard, 438
Snowdon Summit, Purchase of, by Sir E. Watkin, 282
Soaring, Effects of an Intermittent Wind in, M. Marey, 612
Sociology of Rural Communes in France, M. Dumont, 402
Soda, Nitrate of, and the Nitrate Country, Hon. Ralph Abercromby, 186, 308
Solar Eruptions in September 1888, Le Père Jules Fényi, 48, 64
Solar Phenomena for 1888 and 1889, M. Tacchini, 144
Solar Physics, on the Variation of Latitude in the Solar Spots, M. R. Wolf, 383
Solar Radiation: Electric Phenomena produced by, 384; Report to the British Association on, 556
Solar Spectrum, on the Telluric Origin of the Oxygen Lines in, J. Janssen, 104
Solar System, Stability of, D. Eginitis, 167
Sole, the Lemon, Fertilization of the Ova of the, with the Milt of the Turbot, Thomas Scott, 253
Solids, the Elasticity of, E. H. Amagat, 192
Solutions, the Nature of, S. U. Pickering, 166
Somerville (A. A.), on the Principle and Methods of Assigning Marks for Bodily Efficiency, 652
Sorbonne: the New Buildings of the, 349; the Fêtes in Connection with Opening of, 372
Soret (A.), the Occlusion of Gases in Electrolysis of Sulphate of Copper, 239
Sormani (Prof. G.): Influence of Digestive Juices on Virus of Tetanus, 21; Tetanus, 635
Sound-Wave, Mechanical Illustration of Propagation of, F. J. Smith, 620
Sources of Nitrogen in Vegetation, W. Mattieu Williams, 394
South Kensington, National Science Museum, 3
South Kensington, Natural History Museum, 13
South Kensington, Science Collections at, 425, 565
South London Entomological and Natural History Society's Exhibition, 653
South Usuri Region, Colonel Nadaroff, 165
Sowerby (W. C.), *Pontederia azurea*, 327
Sparkless Electro-Magnets, Prof. S. P. Thompson on, 587
Sparrow in America, the, 627
Species in a State of Nature, Variability of, Alfred Russel Wallace, 566
Specific Characters as Useful and Indifferent, Prof. G. J. Romanes, F.R.S., on, 609
Spectrum Analysis: Dr. Grünwald's Mathematical, Joseph S. Ames, 19; the Wave-length of Principal Line in Spectrum of Aurora, Dr. W. Huggins, F.R.S., 68; the Photographic Spectrum of Great Nebula of Orion, Dr. W. Huggins, F.R.S., 95; on the Telluric Origin of the Oxygen Lines in the Solar Spectrum, J. Janssen, 104; Spectrum of χ Cygni, 135; Absorption Spectra of Mixed Liquids, A. E. Bostwick, 189; the Absorption Spectra of Oxygen, Liveing and Dewar, 211, 212; Enlargement of Spectral Rays of Metals, Gouy, 216; the Spectrum of Great Nebula in Orion, Dr. William Huggins, F.R.S., and Mrs. Huggins, 405, 429; Stars with Remarkable Spectra, 424; Prof. C. Piazzi Smyth on the Re-examination of the Spectra of Twenty-three Gas-Vacuum End-on Tubes after Six to Ten Years of Existence and Use, 584; Spectroscopic Survey of Southern Stars, R. L. J. Ellery, F.R.S. 597: Spectro-Photography of Invisible Parts of Solar Spectrum, C. V. Zenger, 539: Index of Spectra, W. Marshall Watts, 641; Spectrum of R Andromedæ, Espin, 656
Spencer (Prof. Baldwin), Trip through District of Croajingolong, 421
Spherical Eggs, Prof. A. G. Greenhill, F.R.S., 10; Prof. G. D. Liveing, F.R.S., 55; Prof. W. Steadman Aldis, 417
Spherical Trigonometry, a Treatise on, and its Application to Geodesy and Astronomy, Dr. J. Casey, F.R.S., 342
Spronck (C. H. H.), the Virus of Diphtheria, 407
Squirrel in Caucasia, Absence of, E. Büchner, 285
Stags' Horns, Implements of, Associated with Whales' Skeletons, found in the Carse Lands of Stirling, Sir William Turner, F.R.S., 634
Stalactite Cave at Hönnethal, Discovery of, 45
Stalactite Grotto, the New, at Adelsberg, 577
Stanley (H. M.): a Visit to Stanley's Rear Guard, at Major Barttelot's Camp on the Aruwimi, with an Account of River Life on the Congo, J. R. Werner, 241; Movements of, 181; News of, 539
Stanley (Hiram M.), Francis Galton, F.R.S., on Natural Inheritance, 642
Starling, Extinct, of Réunion, *Fregilupus varius*, R. Bowdler Sharpe, 177
Stars: Photographic Determination of the Brightness of the, 15; Variable Stars, 16, 46, 64, 86, 110, 135, 165, 181, 210, 231, 256, 284, 308, 329, 352, 375, 403, 424, 449, 483, 516, 539, 550, 578, 598, 629, 656; Photographic Study of Stellar Spectra conducted at the Harvard College Observatory, 17; Right Ascensions of North Circumpolar Stars, Prof. T. H. Safford, 63; on the Motion of, in the Line of Sight, Prof. H. C. Vogel, 109; Photographic Star-gauging, A. M. Clerke, 344; Stars with Remarkable Spectra, 424; New Double Stars, Burnham, 424; the Triple Star Σ 2400, 482; Spectroscopic Survey of Southern Stars, R. L. J. Ellery, F.R.S., 597
State Medicine Syndicate, Annual Examination at Cambridge, 516
Statics for Beginners, John Greaves, 77
Stationary Dust-whirl, J. Lovel, 174
Statistics, Vital, Elements of, A. Newsholme, 145
Steam and Steam-engines, a Text-book on, Prof. Andrew Jamieson, 642
Steel, Alloys of Nickel and, James Riley, 58
Steel, Basic Open-hearth, J. H. Darby, 59
Steel, Influence of Copper on the Tensile Strength of, E. J. Ball and A. Wingham, 59
Steel and Iron, International Standards for the Analysis of, John W. Langley, 558
Steel, on the Influence of Silicon on the Properties of, Hadfield, 587
Steel (R. Elliot), Science Examination Papers, 293
Steenstrup (Prof.), the Great Mammoth Deposit in Moravia, 229
Stefan (Dr.): Ice-growth, 400; Erratum in Paper on Ice-growth, 447
Stellar Evolution, and its Relation to Geological Time, James Croll, F.R.S., A. Fowler, 199
Stellar Photography, Telescopes for, Sir Howard Grubb, F.R.S., 441, 645
Stereometry, W. W. Haldane Gee and Dr. Arthur Harden on, 587
Stewart (Prof. Balfour, F.R.S.), the Actinometer Devised by, 556
Stillman (W. J.), a Cordial Recognition, 245
Stockholm: Royal Academy of Sciences, 96, 120, 264, 540; Proposed Statue to late John Ericsson in, 133
Stomach, the Movement and Innervation of the, Dr. Openchowski, 240
Stone Age in Italy, the, P. Castelfranco, 659
Stone (Prof. William L.), the Hatchery of the Sun-fish, 202
Stonehenge, State of, Howard Cunningham, 547
Stones, Bored, in Boulder Clay, G. W. Lamplugh, 297
Stonyhurst College Observatory, 164
Storm (Prof. Gustav), the Vinland Voyages of Norse Colonists of Greenland, 182
Storms, Prof. H. A. Hazen on, 383
Strachey (General), the Results of European Contact with other Parts of the World, 110

Strain to Stress, on Hysteresis in the Relation of, Prof. J. A. Ewing, F.R.S., 584
Straits Settlements, Proposed Training Schools for Surveyors in, 595
Stranger's Sealed Packet, Mr., Hugh MacColl, R. A. Gregory, 291
Streatfield (F. W.), Isomerism of Alkyl-derivatives of Mixed Diazoamido-compounds, 215
Stress, on Hysteresis in the Relation of Strain to, Prof. J. A. Ewing, F.R.S., 584
Stroud (Prof. Henry), on the E.M.F. produced by an Abrupt Variation of Temperature at the Point of Contact of Two Portions of the same Metal, 585
Structure and Distribution of Coral Reefs, Dr. H. B. Guppy, 53, 173; Prof. T. G. Bonney, F.R.S., 77, 125
Structure in Ice, Columnar, T. D. La Touche, 35
Strathers (John), the Anatomy of the Humpback Whale (*Megaptera longimana*), 592
Stuart (Prof. A.), Modification of Kymoscope, 432
Sturgeons, Palæontology of, A. Smith Woodward, 186
Subdivision of the Electric Light, 152
Subjects of Social Welfare, Right Hon. Sir Lyon Playfair, F.R.S., 637
Sudden Phenomena, the Observation of, 482
Sukkur Bridge, Opening of the, 13
Sully (James), the Principles of Empirical or Inductive Logic, John Venn, F.R.S., 337
Sulphites, Researches on the, M. P. J. Hartog, 383
Sulphur Compounds, M. Chabrié on, 370
Sun: the Total Eclipse of the, December 22, 1889, 462; Observations of Twilight and Zodiacal Light during the Total Eclipse of the, December 21, 1889, Prof. Cleveland Abbe, 519; Rotation Period of the, Henry Crew, 550; Report to the British Association on Solar Radiation, 556; Electric Phenomena Produced by Solar Radiations, Albert Nodon, 384
Sun-distilling Apparatus on Atacama Desert, Hon. Ralph Abercromby, 211
Sun-fish, the Hatchery of the, Prof. William L. Stone, 202; Theo. Gill, 319
Sunday Lecture Society, the, 576
Sunset-glows, Dr. M. A. Veeder, 645; at Honolulu, Sereno E. Bishop, 415
Sunsets, the Red, of 1884-85, Prof. Abbe, 189
Sunspots and Weather in India, 230
Survey of the Heavens, Another Photographic, 417
Survey, the Indian, Colonel Thuillier, 444
Surveyors in Straits Settlements, Proposed Training Schools for, 595
Swallows, Desertion of French Coast by, 85
Swan (J. Wilson), on Chromic Acid as a Depolarizer in Bunsen's Battery, 586
Swarts (F.), a New Test for Bromine, 286
Sweden: Antiquities from Iron Age found in, 163; on the Geological History of the Prehistoric Flora of, Dr. A. G. Nathorst, 453; the Preservation of the Eider in, 254; Culture of Swedish Oyster, 229
Swift (Prof. Lewis), Comet 1889 *d* (Swift), 255
Swiss Census, the, 538
Switzerland, Earthquakes in, 84
Sydney, N.S.W.: Records of the Geological Survey of New South Wales, 254; Royal Society of, 263
"Sylvan Folk," John Watson, 221
Sylvester (Prof., F.R.S.), the Value of a Finite Continuous and Purely Periodical Fraction, 192
Symbols, Graphic, the Ta Ki, the Svastika, and the Cross in America, Dr. D. G. Brinton, 373
Symons (G. J., F.R.S.): British Rainfall, 1888, 437; Monthly Meteorological Magazine, 654

Tables, Useful Rules and, William J. M. Rankine, 517
Tacchini (M.), Solar Phenomena for 1888 and 1889, 144
Tainter's Graphophone, G. R. Ostheimer, 167
Taming the Puma, Wm. Lant Carpenter, 542
Tanfilieff (M.), the Process of Transformation of Rivers into Marshes, 163
Tanganyika, Captain E. C. Hore on, 629
Tappenbeck (Lieutenant), Death of, 353
Tashkend, Earthquake at, 283
Tasmania: Systematic Account of the Geology of, Robert M. Johnston, Prof. John W. Judd, F.R.S., 122; Proposed Tasmanian University, 446
Taupin (J.), Exploration of the Lower Laos Country by, 17, 352
Taylor (Canon Isaac): on the Origin of the Aryans, 632; on the Ethnological Significance of the Beech, 632
Teaching of Science, Elementary, 589, 599; Prof. Henry E. Armstrong, F.R.S., on, 645
Teaching University for London, the Proposed, 60
Teasel, the Spiral Torsion in, M. de Vries, 312
Tebbutt's (Mr.) Observatory, Windsor, New South Wales, 550
Technical Education: at Chetham College, 45; Opening of the Jubilee Technical Institute at Bombay, 60; the New Technical Education Bill, 330, 350, 457; Sir Henry Roscoe, M.P., F.R.S., 73, 91; Primary Technical Education in Hungary, Sir Arthur Nicholson, 164, the Government and Technical Education, 304; Report of the National Association for the Promotion of, 350; Technical Education in Central India, 595; Right Hon. Sir Lyon Playfair, F.R.S., on Technical Education, 639; Guide to Technical and Commercial Education, 538; Technical School at Frankfort-on-Maine, 350; Technical School, Manchester, 445, 577
Telephone Disk, Dr. Fröhlich's New Method of Objective Demonstration of Vibrations of, 72
Telephone, the, William Henry Preece, F.R.S., and Julius Maier, Prof. A. Gray, 200
Telephonic Communication between London and Paris, W. Preece, F.R.S., 631
Telescope, the Newall, 114
Telescopes for Stellar Photography, Sir Howard Grubb, F.R.S., 441, 645
Telluric Origin of the Oxygen Lines in the Solar Spectrum, J. Janssen, 104
Tellurium, Dr. B. Brauner on, 214, 284
Temperature, Decrease of, with Increase of Altitude, Prof. W. Ferrel, 446
Temperature, Report to the British Association on the Seasonal Variations of, in Lakes, Rivers, and Estuaries in the United Kingdom, Dr. H. R. Mills, 556
Temperature, Underground, Report to the British Association on, Prof. Everett, F.R.S., 551
Temperatures, some Lake Ontario, A. T. Drummond, 416
Temperatures, Strength of Alloys at Different, W. C. Unwin, F.R.S., 631
Terby (M.), White Spot on Saturn's Ring, 307
Terrestrial Globe at the Paris Exhibition, 278
Terry (Hubert L.) and W. W. Haldane Gee, on the Specific Heat of Caoutchouc, 587
Tertiary Flora of Australia, Contributions to the, C. von Ettingshausen, J. Starkie Gardner, 517
Test of Divisibility by a Prime, Robt. W. D. Christie, 247
Testing of Colour-blindness, Rev. J. F. Heyes, 572
Tetanus, Influence of Digestive Juices on Virus of, Prof. G. Sormani, 21, 635
Thames, Electric Launches on the, Prof. G. Forbes, F.R.S., 630
"Theorem of the Bride," Prof. George J. Allman, F.R.S., 299, 320
Thermal Relations, the Law of, Wm. Ferrel, 310
Thermodynamics: Impossibility of Existence of Diamagnetic Bodies, P. Duhem, 118
Thermometer, on the Black-bulb, *in vacuo*, Prof. McLeod, F.R.S., 585
Thermometer, Six's, for Soil Temperature, Modification of, Prof. Milton Whitney, 230
Thermometers, Mercurial, Rogers and Woodward, 559
Thermometric Scale, a New, Prof. G. Forbes, F.R.S., and W. H. Preece, F.R.S., on, 587
Thionic Series, the, Marcellin Berthelot, F.R.S., 23, 95
Thiophosphoryl Fluoride, Thorpe and Rodger, 94
Thomasberg, Traces of Glacial Action on, 163
Thome (Dr.), Variable η Argûs, 550
Thompson (Arthur), Osteology of Veddahs of Ceylon, 118
Thompson (Beeby), Middle Lias of Northamptonshire, 341
Thompson (Elizabeth) Science Fund, the, 209
Thompson (Prof. Silvanus P.): Notes on Polarized Light, 143; Methods of Suppressing Sparking in Electro-Magnets, 190; Geometrical Optics, 190; Optical Torque, 232, 257; a Phenomenon in the Electro-Chemical Solution of Metals, 586; on Sparkless Electro-Magnets, 587

Thomson (Basil H.), on the Louisiade and D'Entrecasteaux Islands, 256
Thomson (Joseph), Travels in the Atlas and Southern Morocco, 149
Thomson (Sir William, F.R.S.): Popular Lectures and Addresses, Prof. Oliver J. Lodge, F.R.S., 433; on Boscovich's Theory, 545
Thorpe (Prof. T. E., F.R.S.): the Magnetic Disturbing Forces of British Isles, 66; Thiophosphoryl Fluoride, 94; Dmitri Ivanowitsh Mendeleeff, 193; and Prof. A. W. Rücker, F.R.S., on the Relation between the Geological Constitution and the Magnetic State of the United Kingdom, 585, 609
Three Cruises of the *Blake*, Alexander Agassiz, Dr. John Murray, 361
Thuillier (Colonel), the Survey of India, 444
Thunderstorms, the Recent, W. Marriott, 238
Thunderstorms in South Germany, Velocity of Propagation of, Dr. Lang, 283
Thurston (Edgar), Tuticorin Pearl Fishery, 174
Thwaite (B. H.), Gaseous Fuel, 342
Tian-Shan, Exploration of the Eastern, Brothers Grum-Grzimailo, 65
Tiberias, Proposed Meteorological Observations at, Dr. Torrance, 654
Tibet, the Russian Expedition to, 65
Tidal Observations in Canada, Fourth Report to the British Association of the Committee appointed to Promote, Prof. A. Johnson, 554
Tiddeman (R. H.), on Concurrent Faulting and Deposit in Carboniferous Times, 609
Tierra del Fuego, the Inhabitants of, Rev. C. Aspinall, 374
Tietken's Proposed Exploration of Interior of South Australia, 308, 551
Tillinghurst (W. H.), Centenarian Graduates of American Colleges, 284
Tillo (A. de), Mean Altitude of Continents and Mean Depth of Oceans, 239
Timber-Parasites, Prof. H. M. Ward, F.R.S., 67
Timbre, Helmholtz's Theory of, 479
Tin, Coal and, Discoveries in Western Australia, H. P. Woodward, 304
Titicaca, Lake, Dr. Alfred Hettner's Observations on, 308
Todd (Prof.), the United States Eclipse Expedition, 462
Todhunter's Integral Calculus, Key to, H. St. J. Hunter, 593
Tokio, Remarkable Earthquake at, 162
Tokio: the Earthquake of April 18, 1889, Dr. E. von Rebeur-Paschwitz, 294; Fifteen Years' Earthquakes in, 480
Tomlinson (C., F.R.S.): Atmospheric Electricity, 102; on the Theory of Hail, 203; on some Effects of Lightning, 366
Tomlinson (Herbert, F.R.S.), Error in Maxwell's Electricity and Magnetism, 621
Tomsk University, the, 578
Topinard (M.): Differences between Methods of Anthropometry followed by the Artist and the Anthropologist, 562; Chart of Colour of Eyes and Hair in France, 659
Torpedo, the Electrical Organ of, Prof. Fritsch, 24
Torque, Optical, Prof. Silvanus P. Thompson, 232, 257
Torrance (Dr.), Proposed Meteorological Observatories at Tiberias, 654
Torres Straits Collection, Prof. Haddon's, 626
Torres Straits Islanders, the Customs and Beliefs of the, Prof. A. C. Haddon on, 633
Tortoises, Land, on the Aquatic Habits of Certain, R. W. Shufeldt, 644
Toxicology: Toxic Action of Albumose from Seeds of *Abrus precatorius*, Dr. Sidney Martin, 117
Trachea, Physiology of the, M. Nicaise, 612
Traill (Thos. W.), Boilers, their Construction and Strength, 414
Tramway, Northfleet Series Electric, 39
Transcaspian Region, Colonization of, General Annenkoff, 230
Transformism in Micro-biology, A. Chauveau, 612
Transformism in Pathogenic Micro-biology, A. Chauveau, 636
Transvaal, New Map of, Fred. Jeppe, 539
Travellers, an Anthropometric Instrument for, Dr. Garson on, 633
Travels in the Atlas and Southern Morocco, Joseph Thomson, 149
Travels in South Africa, Francis Galton, 570
Trawling Expedition off the Irish Coast, by the Rev. W. S. Green and W. de Vismes Kane, 253
Tree, Curious Effects of Lightning on a, Alfred S. Gubb, 203
Trees on Another's Land, on the Right of Property in, Hyde Clarke, 633
Trépied (Ch.), Observations at Algiers Observatory, 539
Triangle, the Recent Geometry of the, 460
Trichinæ, the Vitality of, Paul Gibier, 588
Trigonometry, Key to Lock's Elementary, Henry Carr, 125
Trigonometry, Spherical: a Treatise on, Dr. J. Casey, F.R.S., 342; Delambre's Analogies, R. Chartres, 644
Trigonometry, Treatise on, W. E. Johnson, 542
Trimorphism in *Scabiosa succisa*, Arthur Turner, 646
Trinidad Botanic Garden, 421
Trognitz (Herr), Areas of South American States, 446
Tropæolum, Abnormality in, Prof. Alfred Denny, 125
Trotter (Alex. P.): a Refraction Goniometer, 71; on a Curve Ranger, 631
Trout, Lake, Reared at Champ de l'Air, Prof. Blanc, 422
Trouton (Fred. T.): Experiments on Electro-magnetic Radiation, including some on the Phase of Secondary Waves, 398; Experiments on Radiation with Prof. Hertz's Mirrors, 585; Temporary Thermo-Currents in Iron, 587
Tsien-Tang Kiang, the Bore of the, Captain W. U. Moore, 163
Tucker (R.) some Properties of the Number Seven, 115
Turbot, the Fertilization of the Milt of, with the Ova of the Lemon Sole, Thomas Scott, 253
Turbulent Liquid Motion, on an Electro-magnetic Interpretation of, Prof. Geo. Fras. Fitzgerald, F.R.S., 32
Turkestan, Earthquake in, 61, 327
Turkestan, Russian, Culture of American Cotton-Tree in, A. Wilkins, 180
Turner (Arthur), Trimorphism in *Scabiosa succisa*, 643
Turner (R.), the Uredineæ and Ustilagineæ, 653
Turner (Sir William, M.B., F.R.S.): Opening Address, Section H (Anthropology), at the Meeting of the British Association, 526; on the Placentation of the Dugong, 611; on Implements of Stags' Horns associated with Whales' Skeletons found in the Carse Lands of Stirling, 634
Turtle-headed Rock Cod, 77
Tuticorin Pearl Fishery, Edgar Thurston, 174
Twilight and Zodiacal Light, Observations of, during the Tota Eclipse of the Sun, December 21, 1889, Prof. Cleveland Abbe, 519

Unit of Self-Induction, Name for, Prof. Oliver J. Lodge, F.R.S., 11
United States: Proposed New Telescope for Harvard University Observatory, 252; Agricultural Experimental Stations in the, 455; Stones and Geyser Outbreak in, 516; Water-Gas in the, Alex. C. Humphreys, 630
Universities: University Intelligence, 20, 142, 166, 189, 212, 237, 334, 483, 611, 659; Proposed Teaching University for London, 60; Report of the Royal Commission on a University for London, 121, 149; Sir Lyon Playfair on Universities, 204; University Extension, the Second Summer Meeting, 281, 447, 549; the Grant for University Colleges, 304; Astronomy at Johns Hopkins University, 351; Important Bequest to, 627; the Tomsk University, 578; Proposed Tasmanian University, 446
Unwin (W. C., F.R.S.), on the Strength of Alloys at Different Temperatures, 631
